## Version History:

- v 2.5 Jun 04/14 - Out of date flow update. Error messages. **Need final copy on pages 8, 10, 11, 12, 13, 14.**
- v 2.4 May 22/14 - Mobweb landing page design update.
- v 2.3 May 22/14 - YP app detection flow is updated.
- v 2.2 May 02/14 - Shared trigger update.
- v 2.1 Apr 30/14 - Followed collection updates status is removed.
- v 2.0 Apr 18/14 - Custom action sheet feature removal. Misc updates
- v 1.9 Apr 11/14 - Follow functionality is added back. Mobileweb landing page update.
- v 1.8 Apr 9/14 - Private/Public trigger was updated. Copy updates. Mobile Web dead link page.
- v 1.7 Apr 8/14 - Name change option for default collection.
- v 1.6 Apr 7/14 - Removed following functionality, misc updates.
- v 1.5 Apr 2/14 - Infoline/popups update. Copy updates. General updates after team review on Apr 01. Unfollow/Save flows for unfollowing collection.
- v 1.4 Apr 1/14 - Sharing options update. Collection type filtering. Unshare mode update. More updates after Kit feedback.
- v 1.3 Mar 21/14 - Sharing info element was moved into Edit Collection view. User flows updates. Following collections icons are added.
- v 1.2 Mar 19/14 - Sharing info access change. Mobile web flow is updated.
- v 1.1 Mar 18/14 - Added new sharing options, Collection view revision, Sharing stats update on Collection level, Pre-sharing popup update. MobWeb flow update.
- v 1.0 Mar 13/14 - initial wireframes proposal.

## Overview:

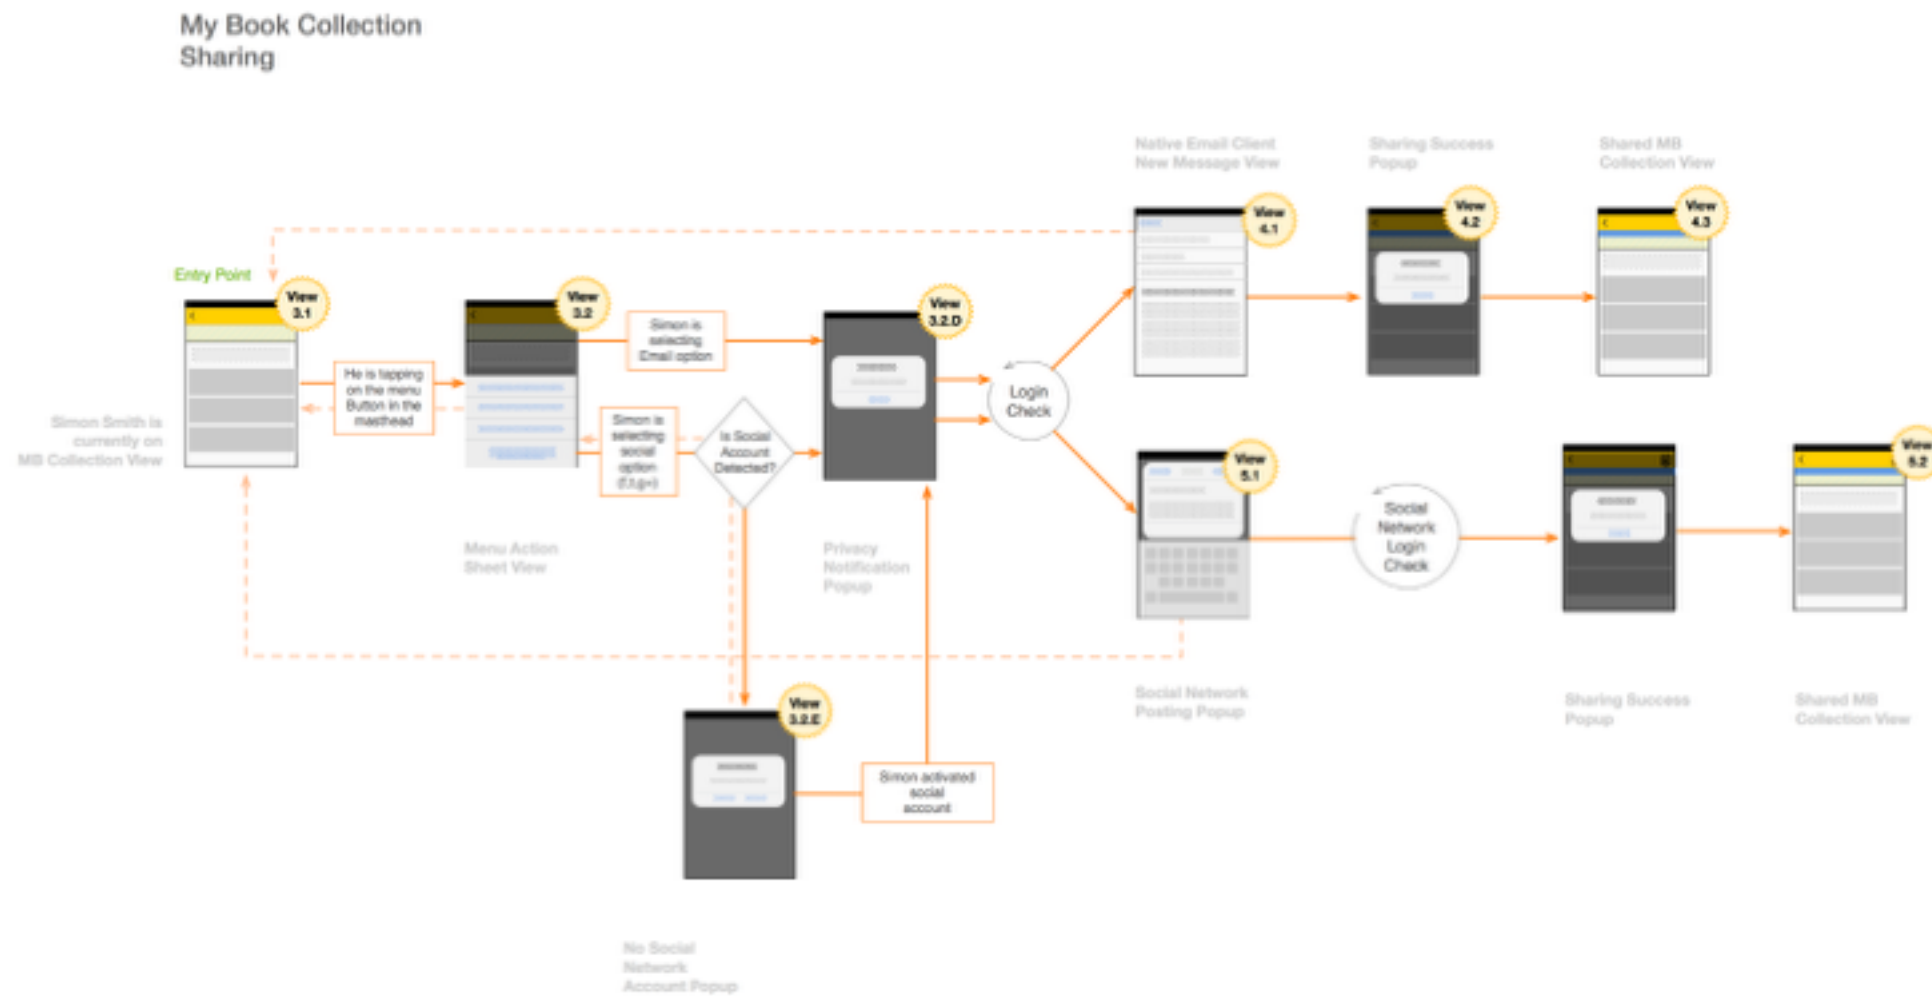

This document contains the wireframes that detail Apps 4.3 Sending a Collection feature.  
Project Wiki Page: <http://onewiki.yellowpages.com/display/CP/MyBook+--+Send+a+collection>  
and <http://onewiki.yellowpages.com/pages/viewpage.action?pageId=192598026>

**Note: wireframes do NOT reflect visual design. Refer to visual design specifications document for final layout look/feel.**

## Notes Icons:

-  - general notes
-  - interaction notes

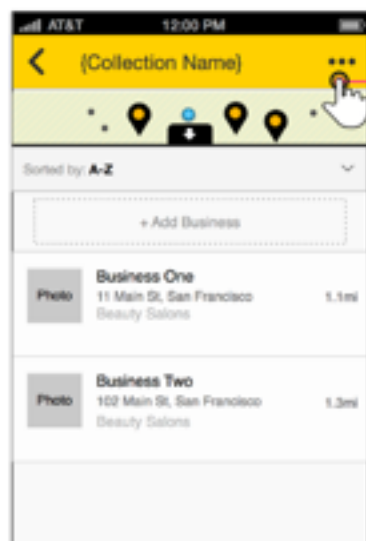

## Legend:

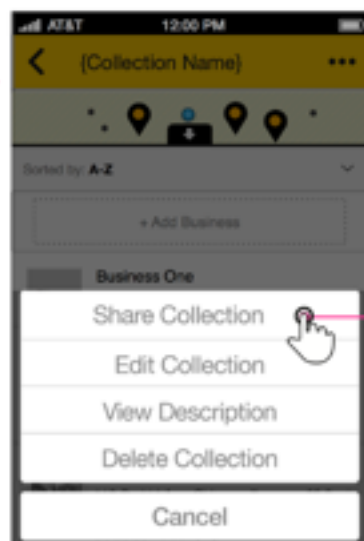

## 3.1 Initial View

## Overview

A user can access Share Collection feature from the menu in the masthead.

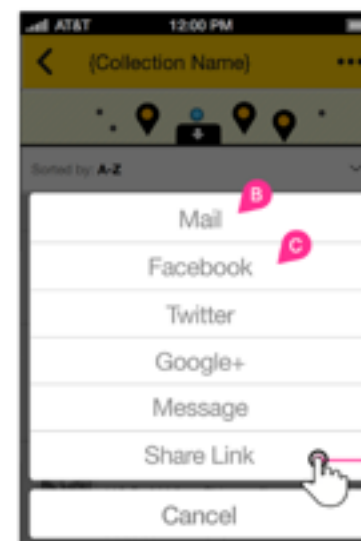

## 3.2 Collection Action Sheet

## Overview

A user can share collection by tapping on Share Collection option on the action sheet.

## 3.3 Sharing Options (iOS)

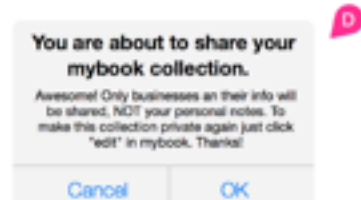

## Overview

On the action sheet a user can see 4 sharing options: Email, Facebook, Twitter, Google+.

B. For email sharing details please see page 4.

C. For social sharing details please see page 5.

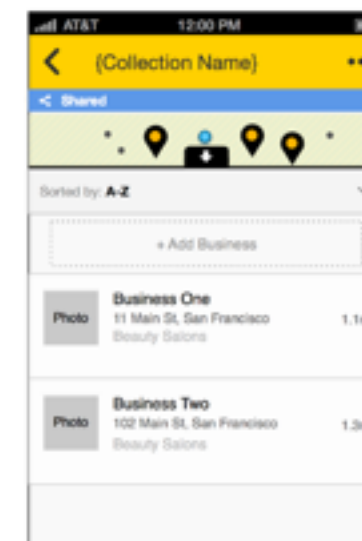

D. Sharing popup will be shown before sharing:

E. No Social Network Account is configured:

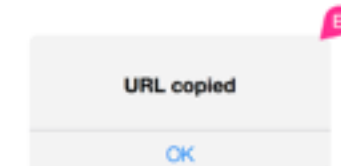

## 3.4 Collection with Shared Infoline

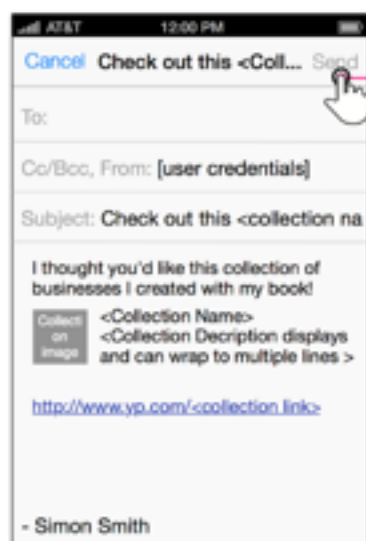

## Overview

In order to send a collection the user must be signed-in and have a username/display name.

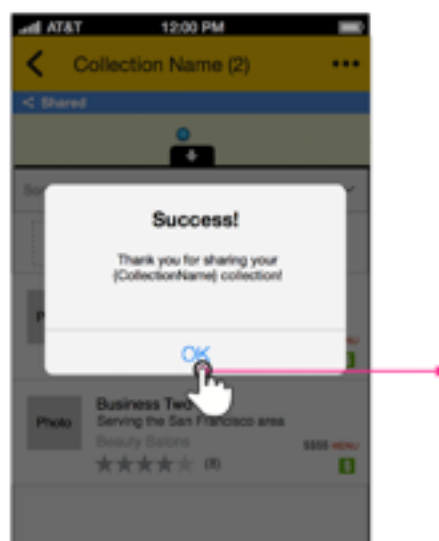

E. Before landing this view a user will see following popup:

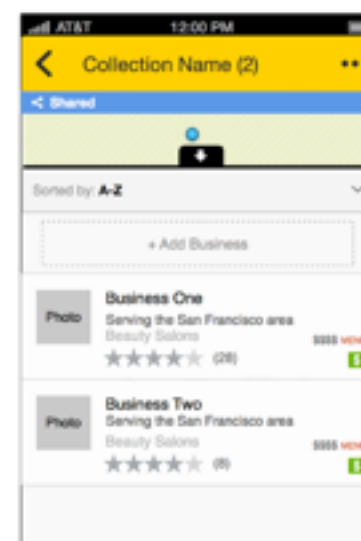

## 4.1 Email Client Preview

## 4.2 Sharing Confirmation

## 4.3 Sharing Confirmation

**Overview**

After tapping on Share via Email option a user will see email client view on his screen.

Email message content is: Subject, Intro message, Collection Image, Collection Name, Collection Description, Link to the Collection.

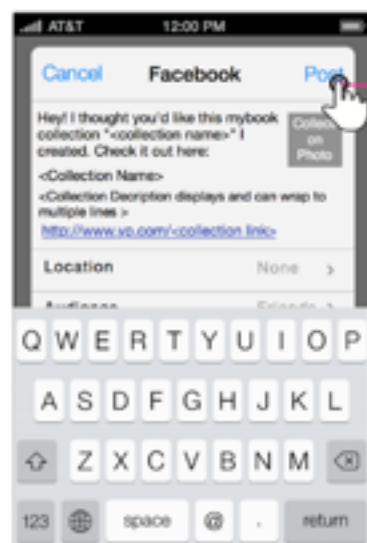

**Overview**

After sending the email a user is redirecting back to YP app: Collection View with a sharing infoline and the Success popup.

**Overview**

After tapping on OK on the popup a user will stay on the Collection View.

## 5.1 Facebook Sharing

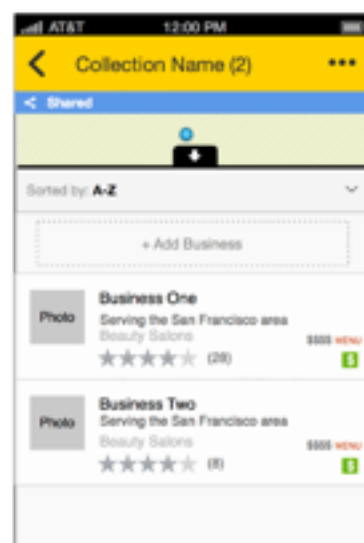

**Overview**

After tapping on Share via Facebook option a user will see sharing popup on his screen.

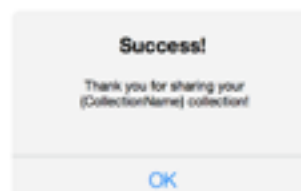

The posting content is: Intro message, Collection Image, Collection Name, Collection Description, Link to the Collection.

Also Facebook location and audience options will be presented.

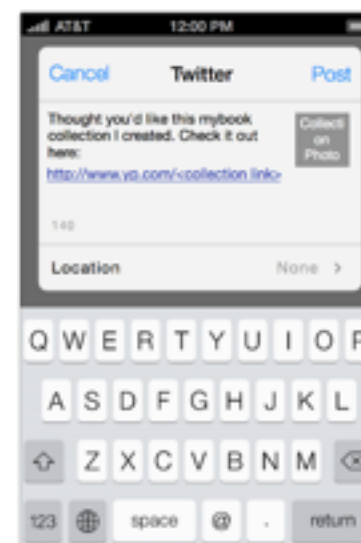

## 5.2 Confirmation

**Overview**

After sharing via <Social Network> a user is redirecting back to YP app: Collection View with a sharing infoline and a following Success popup:

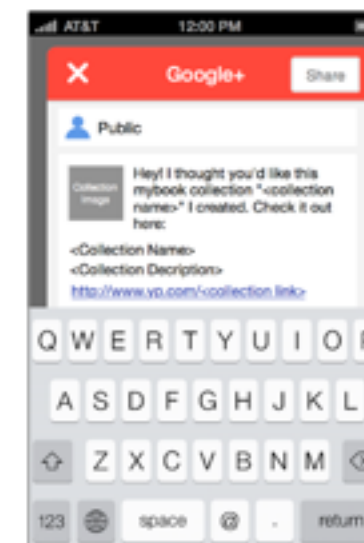

## 5.3 Twitter Sharing

**Overview**

After tapping on Share via Twitter option a user will see sharing popup on his screen.

The content is: Image, Collection Intro, Link to the Collection.

## 5.4 Google+ Sharing

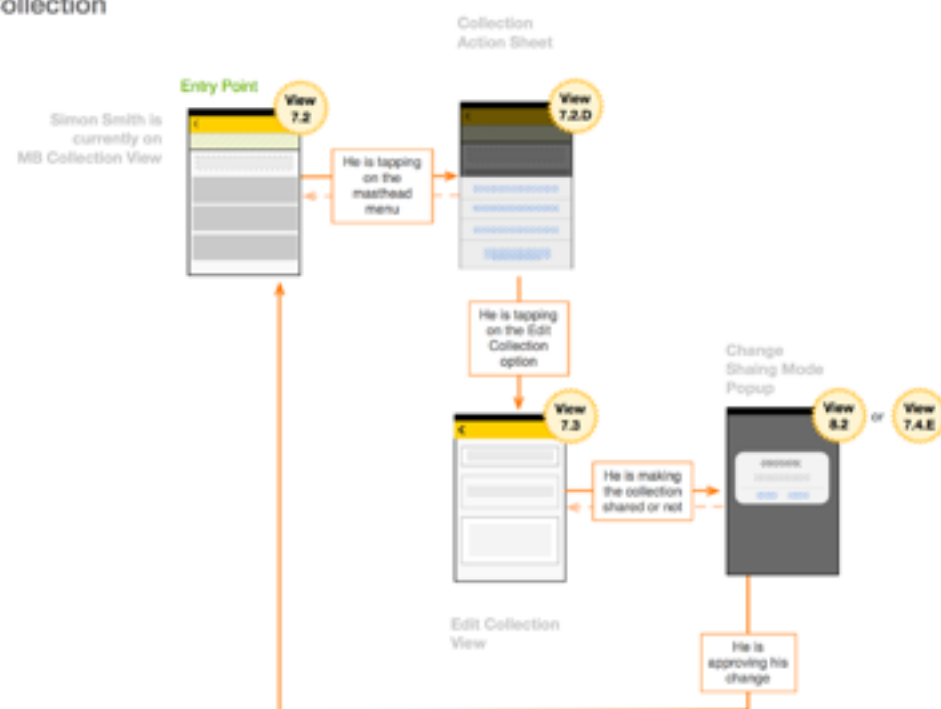

**Overview**

After tapping on Share via G+ option a user will see sharing popup on his screen.

The posting content is: Intro message, Collection Image, Collection Name, Collection Description, Link to the Collection.

Also G+ audience options will be presented.

## 7.1 Shared Icon in mybook

**Overview**

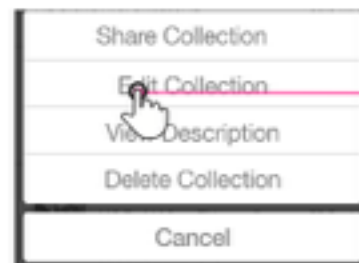

A. Shared Collection icon.

## 7.2 Shared Collection

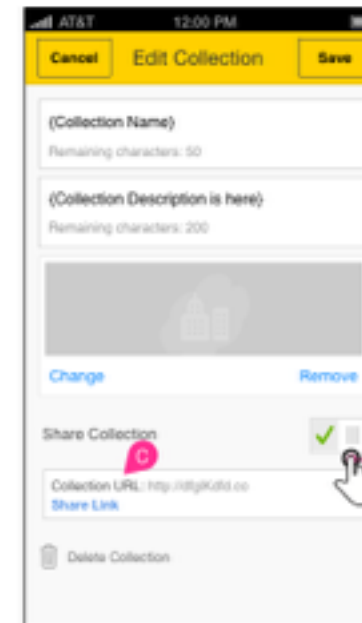

**Overview**

On Shared Collection View a user can see Sharing info line with sharing statistics.

B. A user can unshare (Make Private) the collection from the masthead menu -> Edit Collection option:

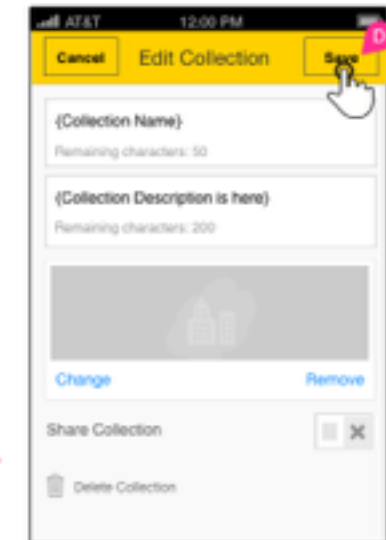

## 7.3 Edit Collection View

**Overview**

A user will see Share Collection trigger to Edit view.

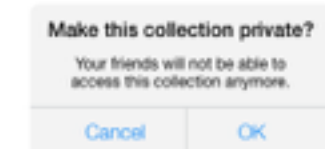

C. Once a collection is shared a user can see and copy collection link to buffer by tap on Share Link link.

## 7.4 Trigger was changed to Private

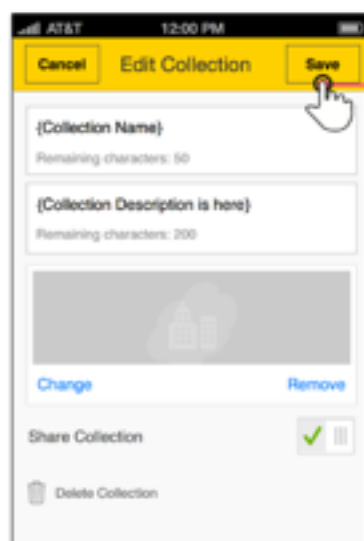

**Overview**

A user changed Share Collection trigger to OFF mode and tapped to Save edits.

D. Before saving collection a user will see this confirmation popup:

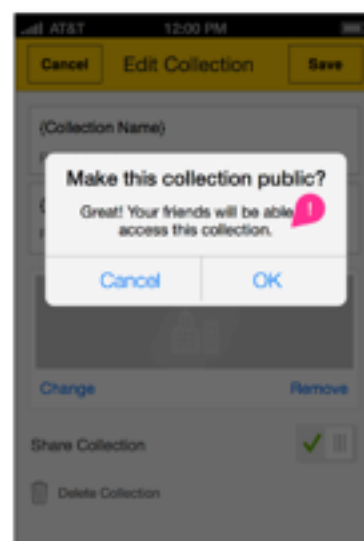

## 8.1 Trigger was changed to Public

**Overview**

If a user wants to change collection again to public mode, he/she is setting the trigger in OFF state and tapping on Save button in the header.

## 8.2 Make Collection Public Popup

**Overview**

There is going to be "Make this collection public" confirmation popup.

1. Need final copy

## 8.3 Default Collection - Action Sheet

**Overview**

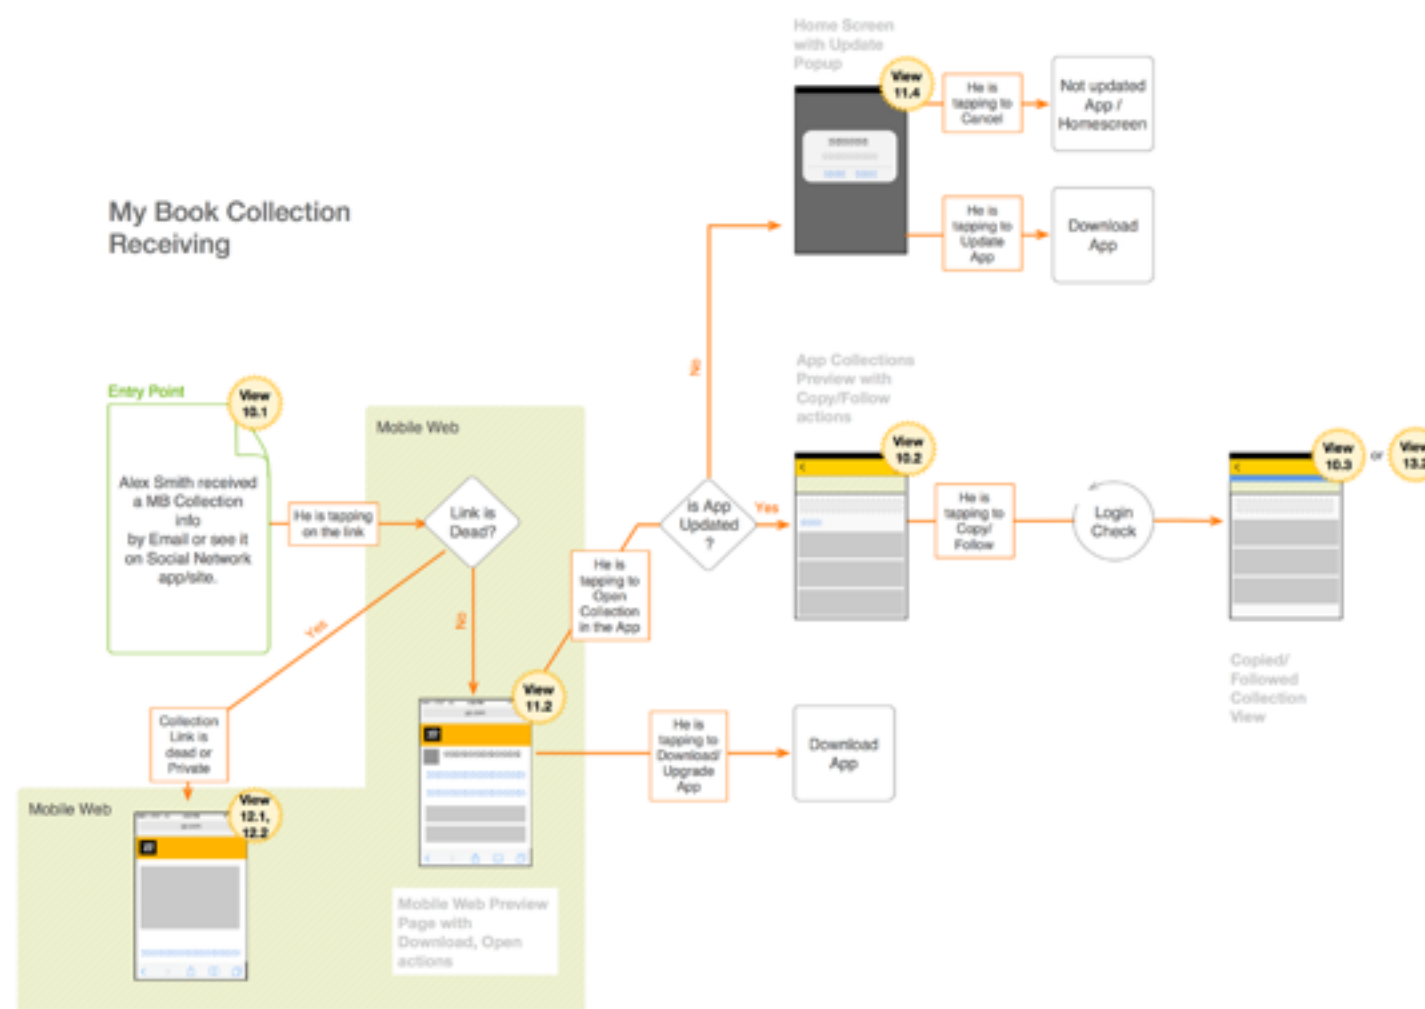

For default collections (such as Food, Home, etc) a user will find this actions sheet by tapping menu button in the masthead.

## 8.4 Default Collection - Edit View

**Overview**

There is only Make Private feature displayed on default collection Edit view.

\*A user cannot change Collection Title, Description, Photo, or Delete default collections.

## 10.3 Copied Collection

## Overview

A user is receiving an email with my book collection description and a link.

## Overview

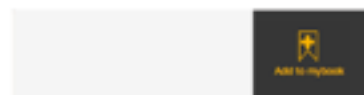

After Mobile Web redirection a user is landing on iPhone or Android apps MB Collection View.

A user can Copy Collection or go back to MB page (B).

There is no Add a Business button because this collection is not saved or followed.

A. Long collection names we are showing in two lines. 60 chars max.

C. From swipe menu a user can add a business to MB, but not to add Note before saving:

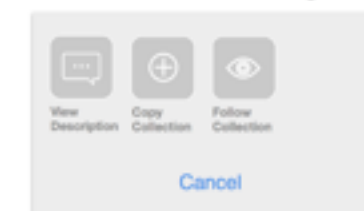

## Overview

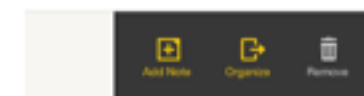

Upon completion, they should return to that collection, with sharing info line.

The info line has sharing info and sender's name.

The masthead menu is following:

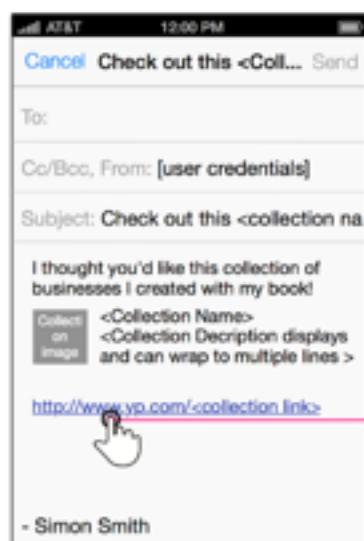

D. After collection coping a user can also add notes to the business:

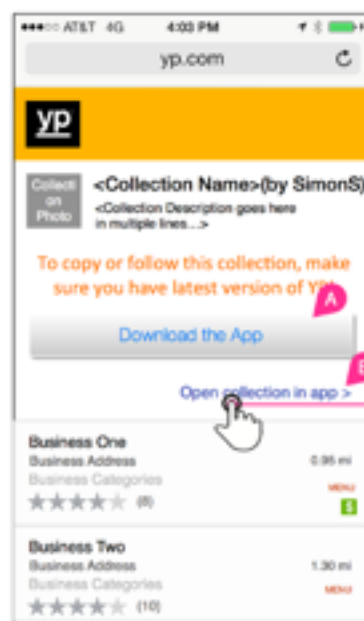

## 11.1 Received Message

## Overview

A user is tapping on the link to see the collection.

## 11.2 MobWeb Landing Page

## Overview

If there is no YP App detected automatically then a user will be redirected to Mobile Web landing page.

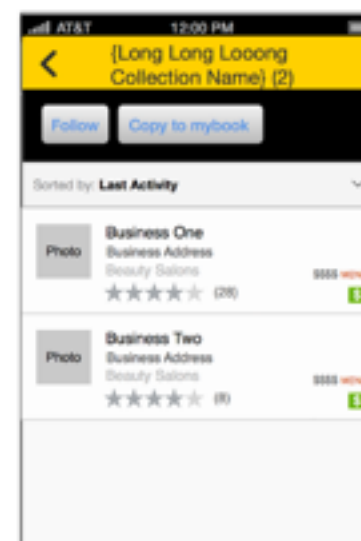

This page will inform a user they need to download the YP app.

Infinite scroll after first 10 listings.

A. By tapping on Get Free YP app button a user will be redirected to App Store.

B. By tapping on Open in YP app link a user will be redirected to Collection View in YP app.

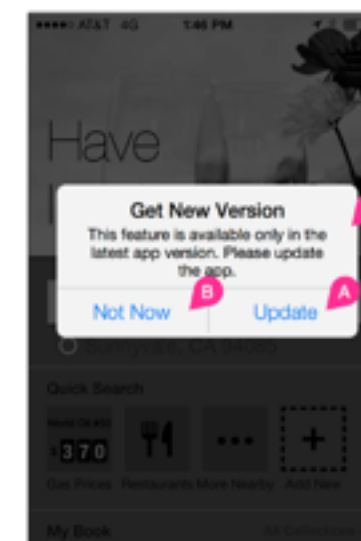

## 11.3 Opened Collection (App)

## Overview

If a user has the latest versions of YP app supporting this feature he'll be redirected to the collection.

## 11.4 Out of Date Popup on Homescreen

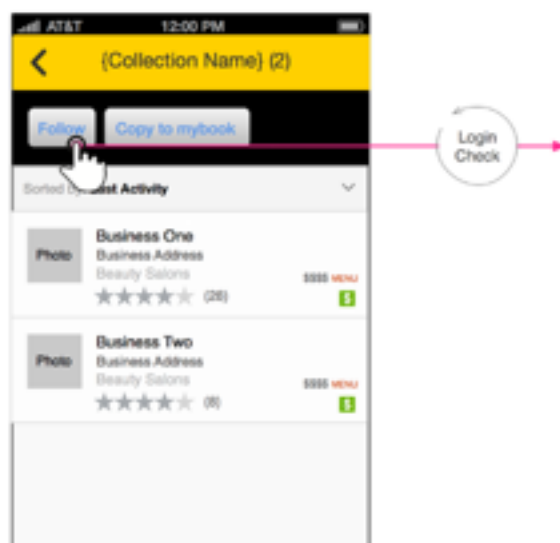

## Overview

If a user doesn't have the latest YP app version of YP supporting this feature he'll be redirected Home Screen with the following popup.

A. By tap on Update option a user will be taken to regular download app cycle.

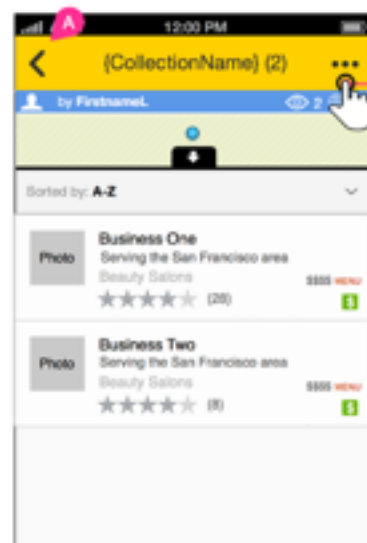

B. By tap on Not Now option a user will continue to use YP app without update.

## 13.1 Collection View with Save/Follow

**Overview**

After Mobile Web redirection a user is landing on iPhone or Android apps MB Collection View.

## 13.2 Following Collection

**Overview**

When they have completed their authentication, they should be returned to the collection with an indication that they have followed the collection (sharing infoline).

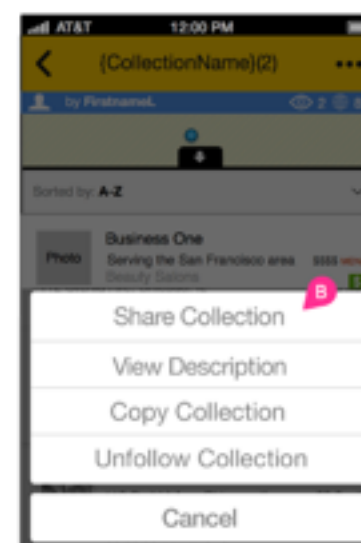

**A.** Back button is leading to My Book View.

All businesses in the YP database in the original collection appear in the followed collection.

No personalized information will travel with the collection (notes, custom contact info, unlisted businesses, etc).

Followed collections are read only.  
Followed collections cannot be shared.

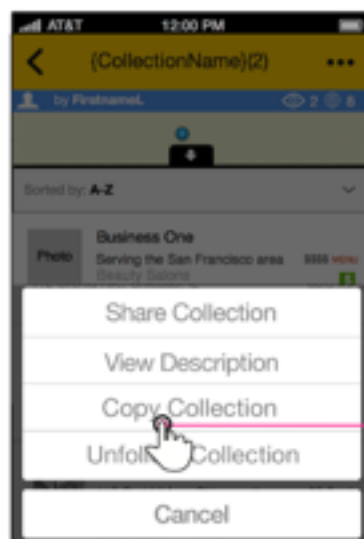

## 13.3 Following Collection Menu

**Overview**

No Add a Business and Edit options.  
A user can share the following collection.  
There are also View Description and Unfollow options.

**B.** Before sharing a Following collection we are not showing Private Privacy Popup and sharing just original link.

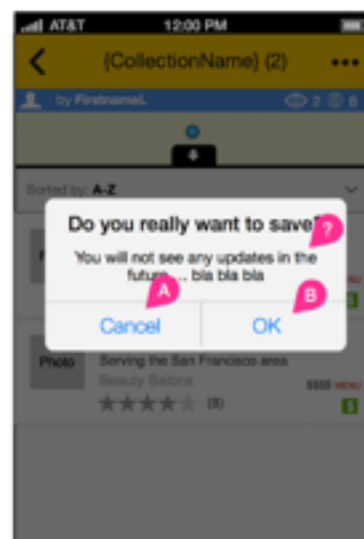

## 14.1 Action Sheet (to Copy)

## Overview

Initial Action Sheet View.

## 14.2 Save Popup

## Overview

? Need copy.

A. By tapping "Cancel" a user goes back to Following Collection View.

B. By tapping "OK" a user is saving a collection and redirecting to Saved Collection View. Similar to View 10.3

## 3.1 Featured Collections on Homescreen

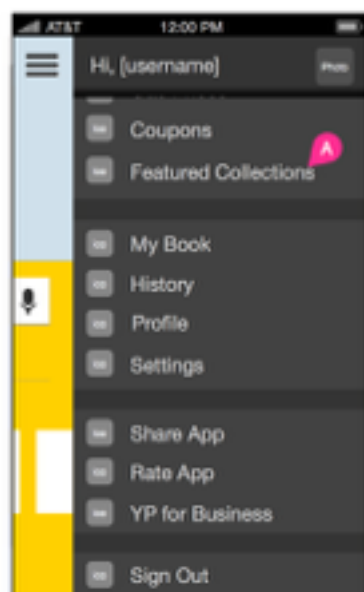

**Overview**

A user will see Featured collections relevant to the geo. All featured collections have a photo, title and number of businesses.

A. By tap on "View All" option a user is going to Featured Collection view (View 4.1).

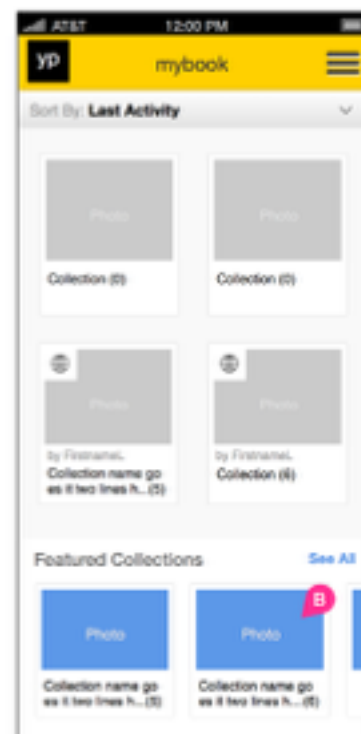

B. By tap on a particular Featured Collection a user is going to Featured Collection Details View (View 4.3)

## 3.2 Featured Collections in Global Nav

**Overview**

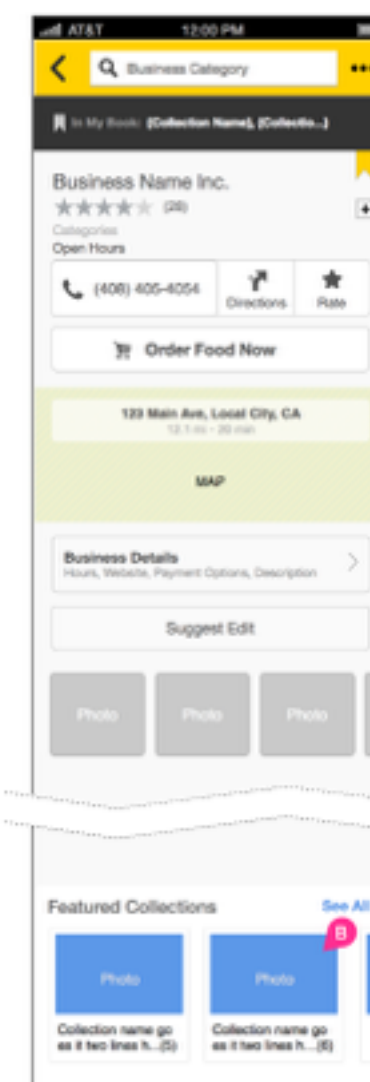

A user will find "Featured Collection" section right after Coupons one.

## 3.3 Featured Collections on mybook

**Overview**

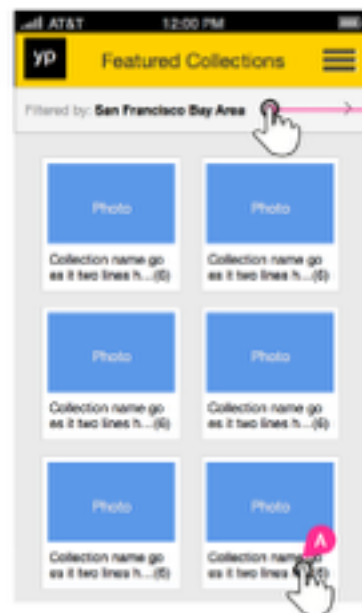

Featured collections widget at the bottom of the my book.

## 3.4 Featured Collections on MIP

**Overview**

Featured collections widget at the bottom of free MIP.

## 4.1 Featured Collections View

## Overview

By tap on View All Collections option a user will be redirected on Featured Collections View and can browse guides there.

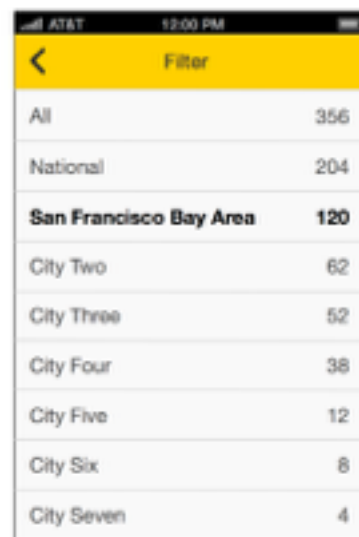

A user will find keywords there and all guides.

A user can filter guides by selecting keywords.

The following elements are presented: photo, title, number of businesses in collection.

A. Goes to 4.3 View.

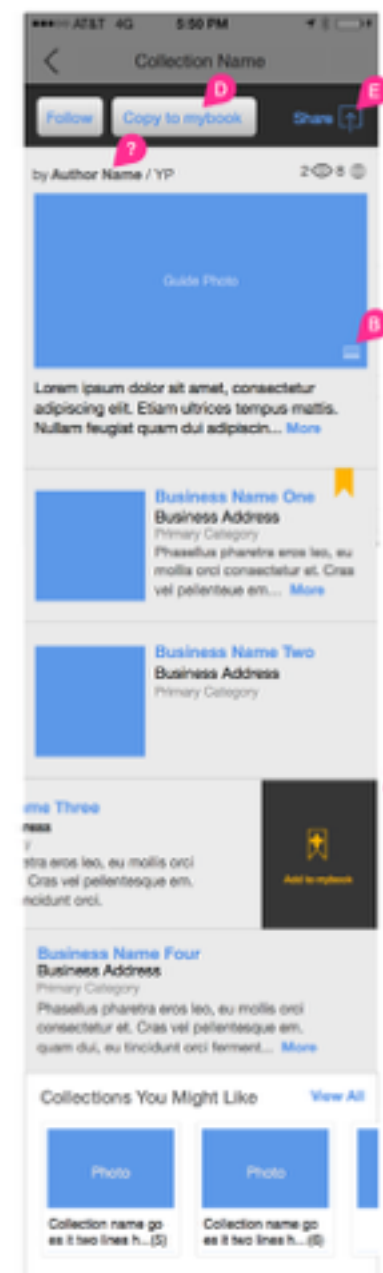

## 4.2 Filter View

## Overview

Current location is selected by default.

## 4.3 Featured Collection Details

## Overview

Each Featured collection may have the following data elements: Title, Description - may include hyperlinks to editorial articles or other pages (750 characters max, the description is shown in 2-3 lines by default), Author (no hyperlink), Cover photo (1+ possible).

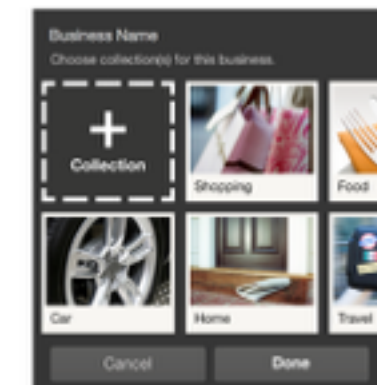

Each business may have the additional data elements: Caption to provide commentary on business such as why it was selected - needs to handle hyperlinks - 500 characters (description is shown in 2-3 lines by default).

Photo for the business - this will also show up in the gallery on the MIP, but may be selected by the curator. A photo is not required for the business.

As a user I may copy or follow the guide just like a shared collection: See copy/follow wiki: <http://wiki.yellowpages.com/pages/viewpage.action?pageId=192598026>

B. A user goes to Photo Gallery view.

C. Swipe to Add to mybook: By swipe a user will see my book organize popup. After adding in my book collections a user will see my book ribbon on the listing.

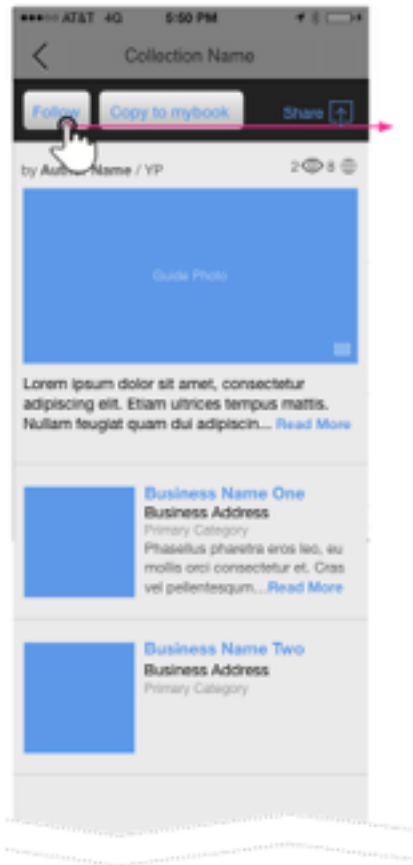

D. By Tap to Copy a Collection a user is adding this collection into mybook.

E. By tap on Share a user will see action sheet.

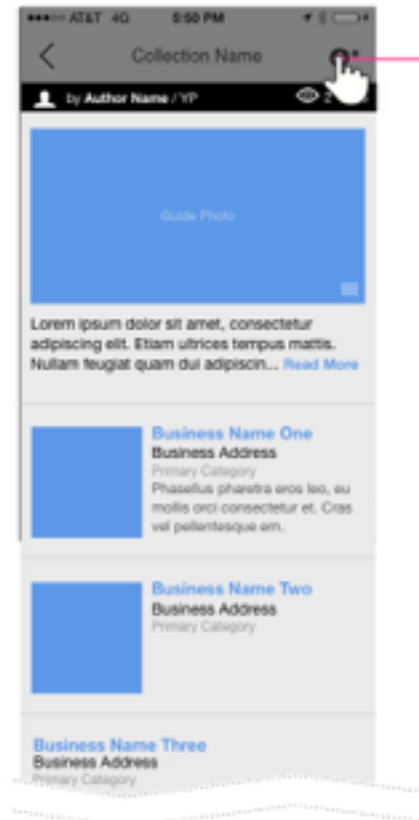

? AuthorName avatar

## 5.1 Featured Collection Details

**Overview**

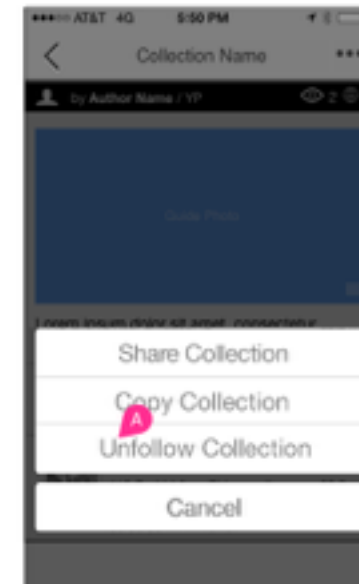

A user can Follow collection, by tap on Follow button on the view.

## 5.2 Following Featured Collection

**Overview**

If a user wants to unfollow the collection he can use the masthead menu button.

## 5.3 Featured Collection Action Sheet

**Overview**

A user can find Share, Copy, Unfollow Collections options on the action sheet. Similar to current following collection action sheet.

A. By tap on Unfollow Collection option user will see following confirmation popup:

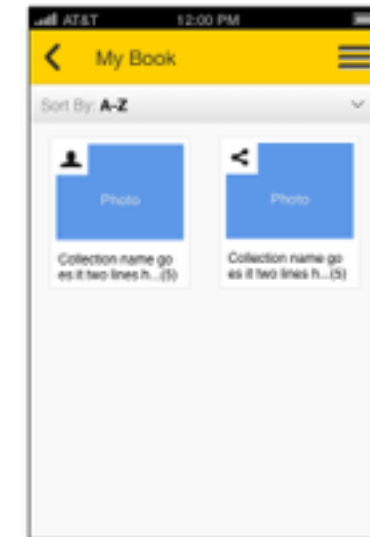

7. Need copy check.

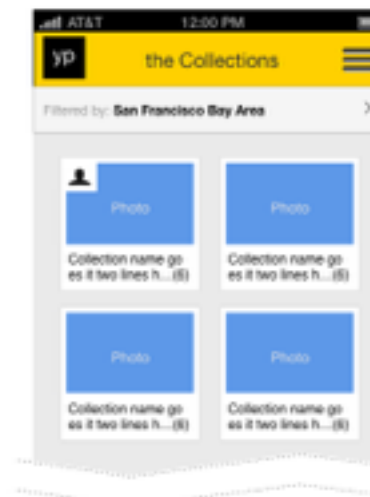

B. By tapping "Cancel" a user goes back to Following Collection View.

C. By tapping "OK" a user is deleting this collection and redirecting to MyBook View or Featured Collections View, based on his entry point. (Currently an access to featured collections is existing on both: mybook and Featured Collection views.)

## 5.4 Following Collection in mybook

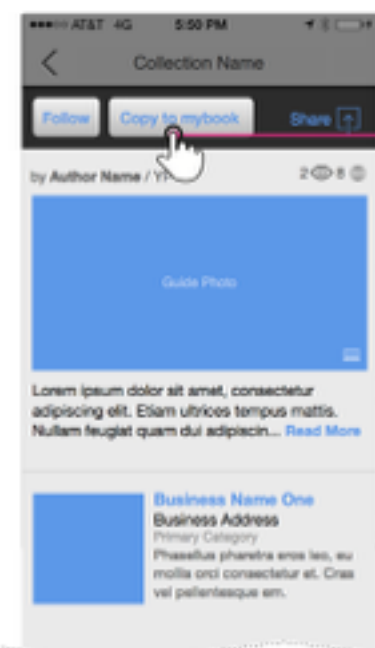

## 5.4.1 Following Collection on Featured Collections View

**Overview**

After Following a Featured Collection a user will find this collection under mybook and Featured Collections sections.

## 6.1 Copying Initial View

## Overview

A user can Copy Featured collection into mybook by tapping on Copy button.

## 6.2 Featured Collection Details

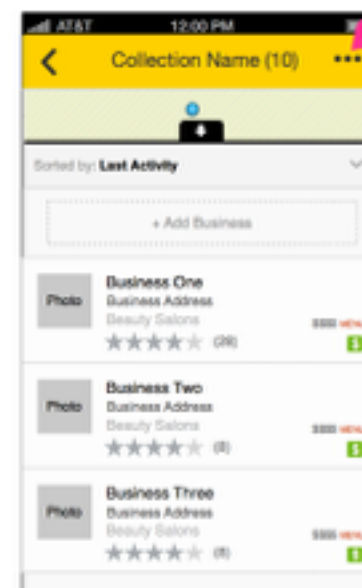

## Overview

If a user tapped to Copy a Featured Collection into mybook we'll inform that it was successfully copied. Also a user will see a button to the copied my book collection (A).

A user can copy the collection many times. Automatic numbers will be added to the copied collections names.

## 6.3 Featured Collection Details

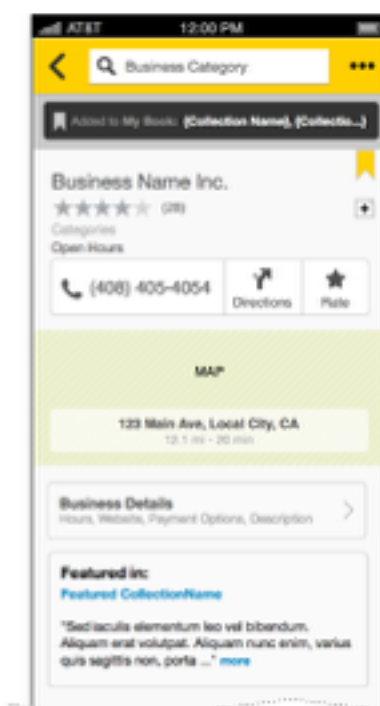

## Overview

B. Collection description a user can find by tap on Menu icon in the masthead, and next View Description option.

A user will see this collection under my book sections.

## 6.4. Featured Collection Business MIP

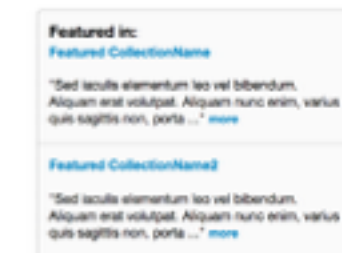

## Overview

If a business belongs to some Featured Collections a user will see some Quote elements with a Featured Business Caption in a MIP content area.

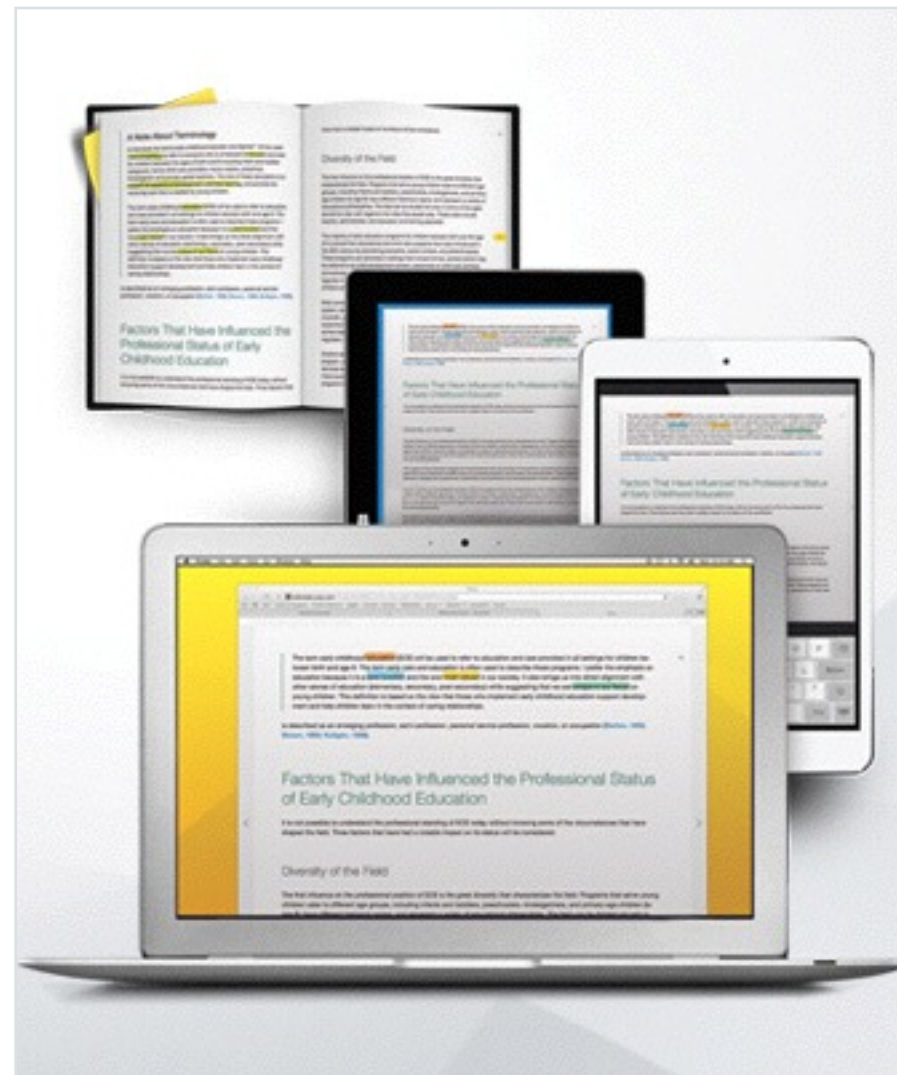

A user will find links to visit Featured Collection.

This is a sample for business caption, if this business is added in 2 or more Featured Collections:

YUZU

The image shows a physical textbook on the left with a yellow bookmark. To its right are three digital devices: a laptop in the foreground, a tablet behind it, and a smartphone further back. All devices display the same eTextbook interface, which includes a yellow header bar and a main content area with text and a sidebar. The background is a light gray with a subtle geometric pattern.

# **Yuzu 3.0**

## Android App

**Version History:**

- v 1.4 Sept 23/15** - Updated Item info view. Add “Remove..” link. Removed “Open Book” link.
- v 1.3 Sept 21/15** - Edit functionality is removed on Hub.
- v 1.2 Aug 18/15** - Search experience updated & more.
- v 1.1 Aug 10/15** - Close to final wires.
- v 1.0 Jun 29/15** - Initial wireframes proposal.

**Overview:**

This document contains the wireframes that detail Yuzu 3.0 Android release.

Project Wiki Page: <https://wiki.bnchalk.com/pages/viewpage.action?spaceKey=UXT&title=Yuzu+3.0+Product+Features>

Note: wireframes do NOT reflect visual design. Refer to visual design specifications document for final layout look/feel.

**Notes Icons:**

-  - general notes
-  - interaction notes

## 2.1 Gestures Actions

### Single tap

1. Opens “Tools” menu, opens any option from menu, and performs any dialog-based actions like “Cancel” or “Done” or “X”.
2. Opens an item in Hub.
3. Turns page if click is at 1/3 of page.
4. Opens a Note in Edit mode.
5. Opens the Highlight menu.

### Press and hold

Creates new Note by opening the “Create Note” panel **Not final**

### Pinch out/in

Zooms out/in

### Hold and drag

Drags and drops Hub items into Labels

### Swipe

Turns page

### Android Native Back Button

Unfocus test inputs, Closes dialog popups, Closes the app

Pan & Turn Fixed.

Feature Description:

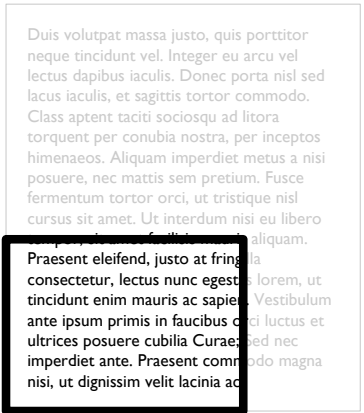

When page is zoomed in past 'fit to width' it's necessary for the user to pan to see all areas of the page.

User will need to turn the page forward and backward while zoomed.

Zoom level should persist from page to page: When page turns 'Next', view is at top of the following page using the same zoom level. If zoomed in farther than fit to width, view is of the upper left corner

When page turns 'Previous,' view is at the bottom of the previous page, using the same zoom level. if zoomed in farther than fit to width, view is of the bottom left corner.

If user is creating a highlight (see AND300\_5003\_HighlightCreation) while zoomed, dragging the highlight creating handles to an area not visible in the viewport pans the view in that direction.

Behavior:

Touch Panning within a zoomed page:

Touch and drag moves image on screen in any direction

When the edge of the page is reached, motion stops

Touch Page Turn while Page View is Zoomed:

User touch/drag to the left or right/bottom or top edge of the page as above

Lifting the finger and moving the page again in the desired direction moves the view to the next (or previous) page:

- Top of page goes to previous page
- Left side of page goes to previous page
- Bottom of page goes to next page
- Right side of page goes to next page

Fixed Scroll.

Feature Description:

When content does not all fit on screen, it's necessary for the user to scroll up or down, left or right, to view all of the content on the page. This is different than panning (see feature AND300\_3006\_Pan&TurnFixed)

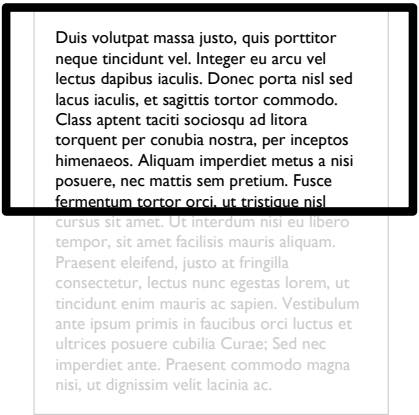

Touch Behavior

Touch Scrolling within a zoomed page:

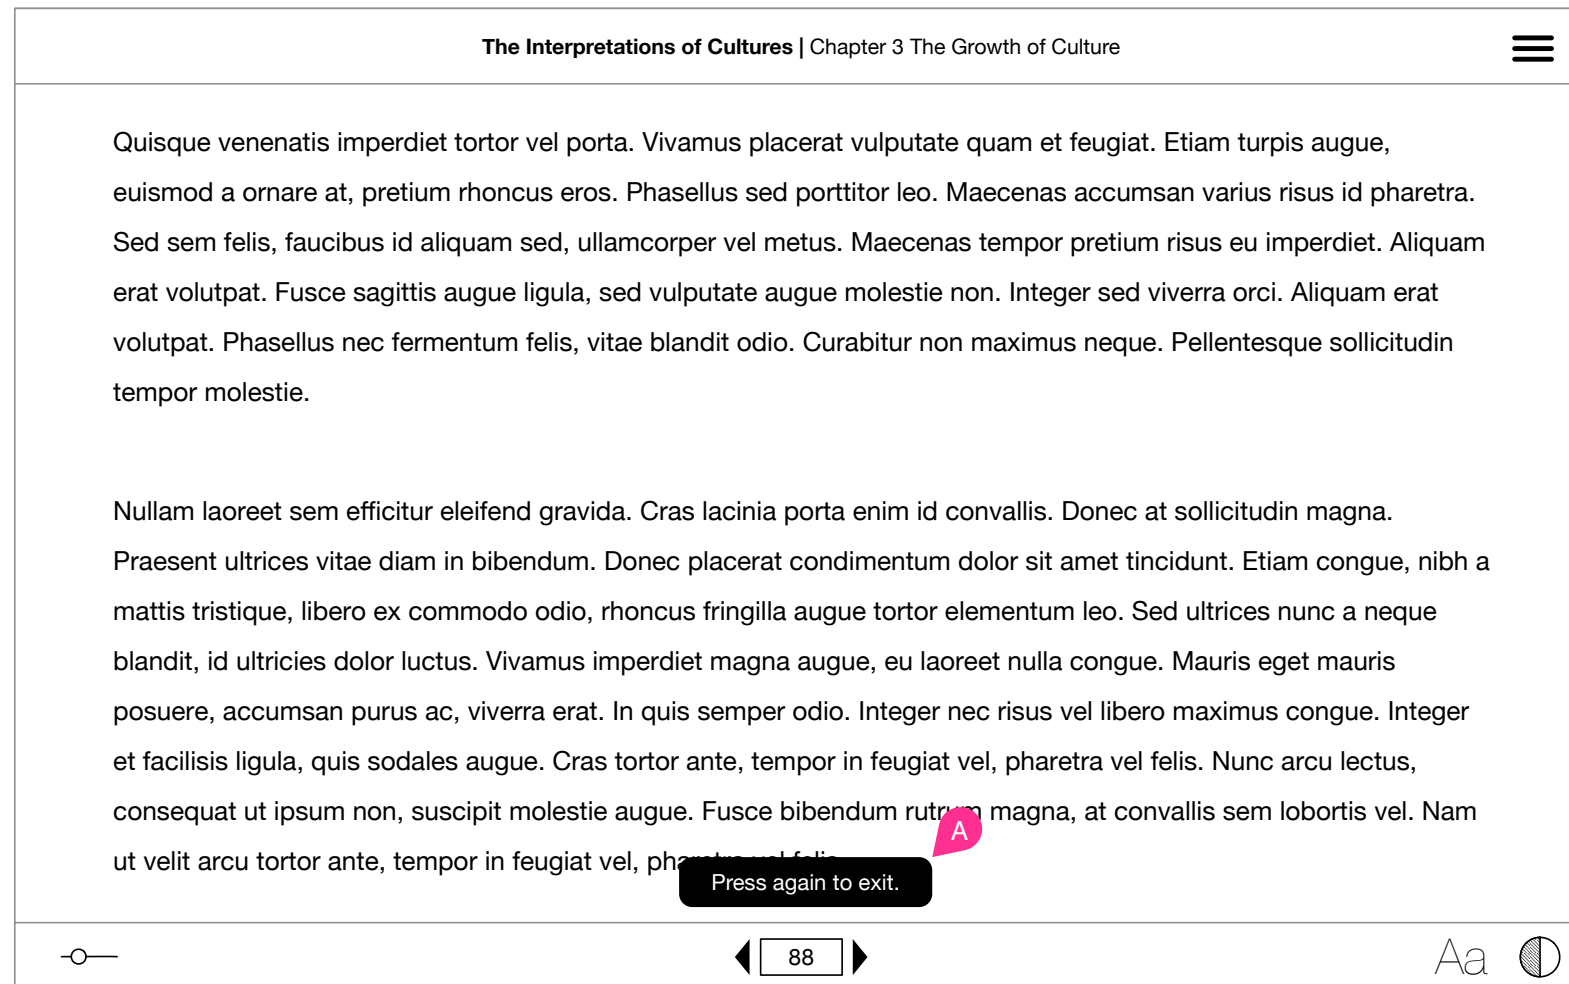

- Touch and drag moves image on screen up and down
- When the edge of the page is reached, motion stops

Touch Page Turn while Page View is at 'fit to width:'

- User touch/drag to the left or right/bottom or top edge of the page as above
- Lifting the finger and moving the page again in the desired direction moves the view to the next (or previous) page. Top of page goes to previous page. Bottom of page goes to next page.

## 4.1 Exit app toast

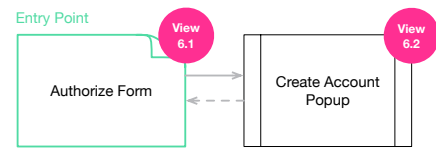

**Overview****Android Native Back button behaviors:**

The Back button also supports a few behaviors not directly tied to screen-to-screen navigation:

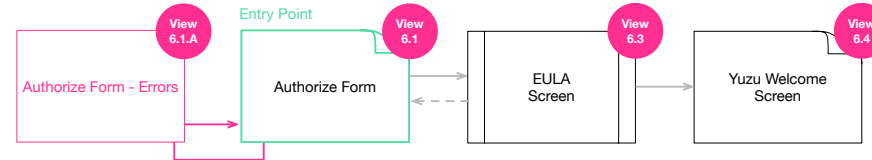

- Dismisses focus
- Dismisses floating windows (Popup, Dialog, Note popups, Keyboards, Analog Navigation - Close/Cancel action)
- Dismisses contextual action bars (Tool Menu, Tool window ), and removes the highlight from the selected items
- Hides the onscreen keyboard (IME)

**A.** The Back button in the Viewer - 1st time calls "Press again to exit." tooltip (See the illustration above), 2nd time closes Yuzu app.

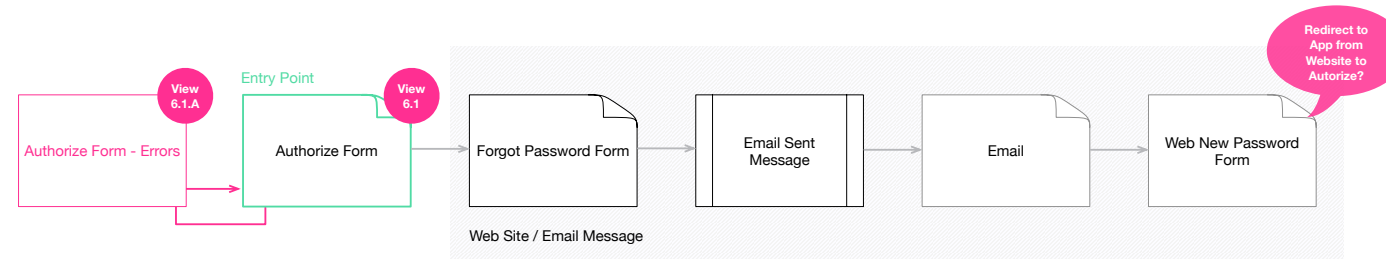

### 5.1 Create Account Flow

6.2 Create Account Popup

Need an account? Create one

### 6.3 EULA Agreement Popup

#### Overview

After a user successfully submitted the authorize form (View 4.1) he will see EULA agreement popup.

**A.** By tap on "I Agree" link a user will be redirected onto Yuzu landing view - Viewer.

**B.** By tap on "I Don't agree" link a user will be redirected back to empty Authorization Form View (View 4.1)

**C.** EULA content could be scrollable. In this case "I Agree" link will be disabled until full scrolling down.

!. Content is TBD.

\*\*\* EULA popup shows also if EULA terms are updated. Has similar actions and behaviors.

More at: YUZ300\_1015\_EULA-T&CAgreement

### 6.4 Welcome Screen

#### Overview

After a user successfully agreed the EULA he we'll be redirected to welcome screen.

If user has not previously accessed materials through their Yuzu account, they will see a takeover screen in the viewer (see wireframe):

A welcome screen will con:

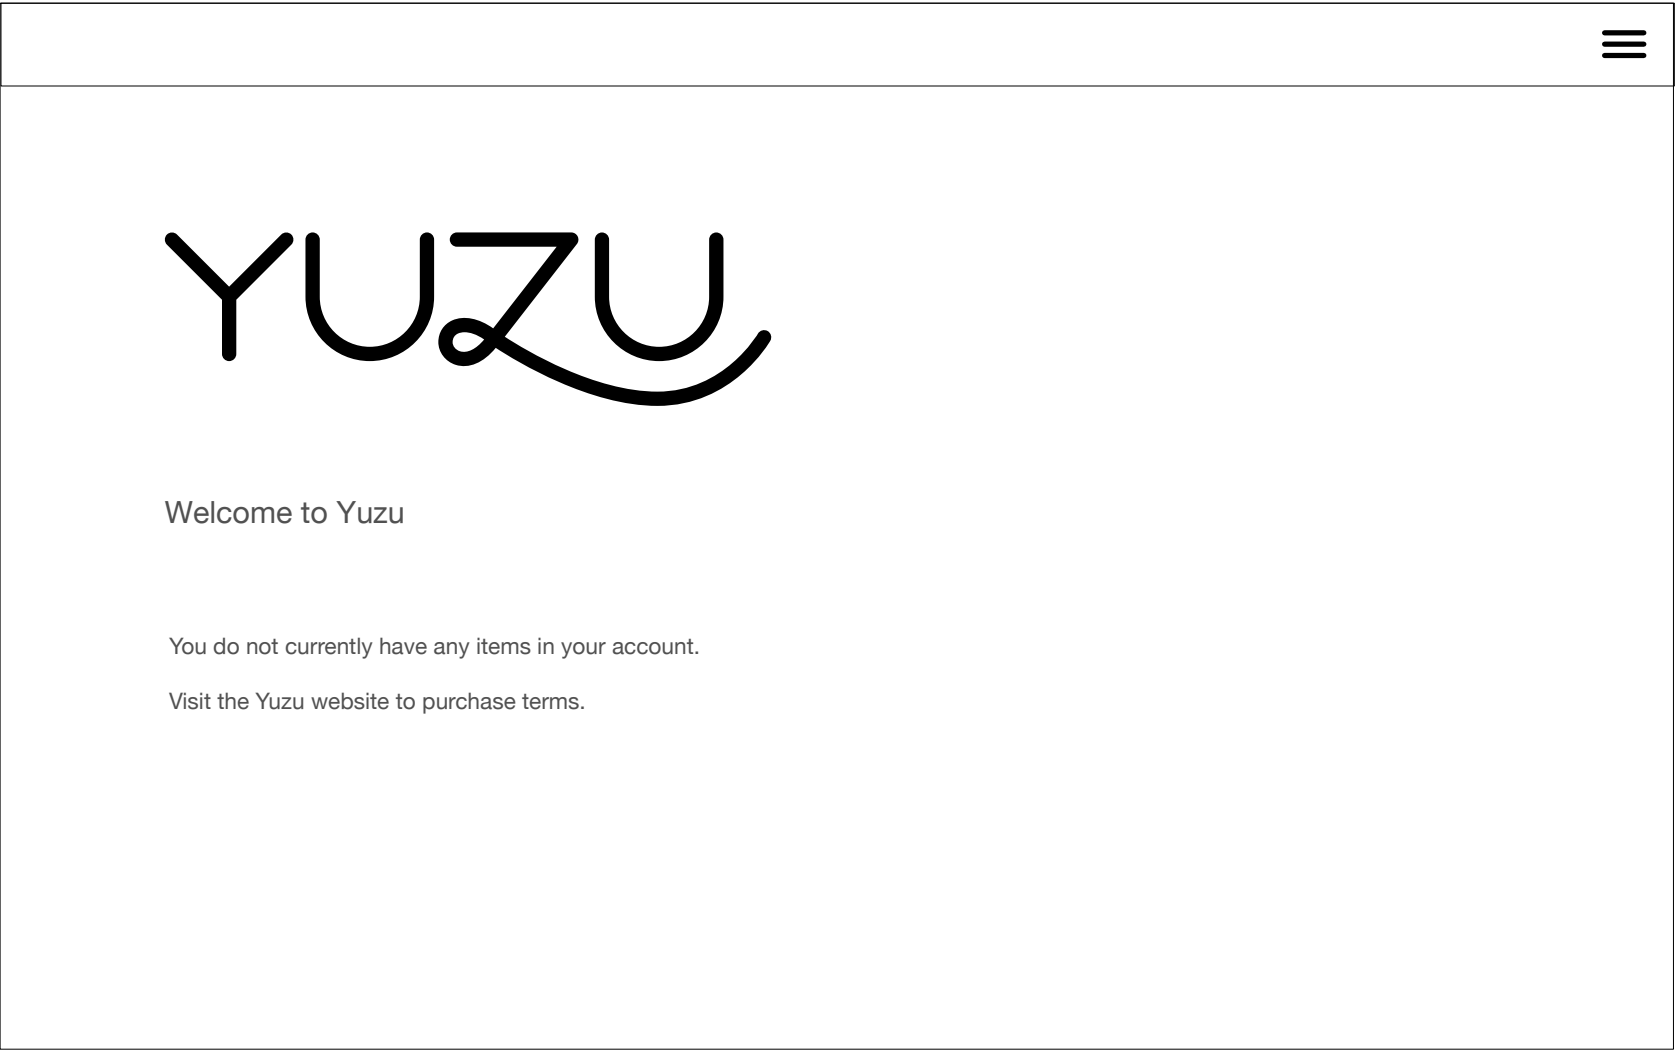

**White background**

**Yuzu logo**

**Text: "Welcome to Yuzu."**

7.3 Empty Hub Message

**Overview**

This screen comes up if user has no item at all in his Hub (Empty Hub message).

7.4 Expired Item

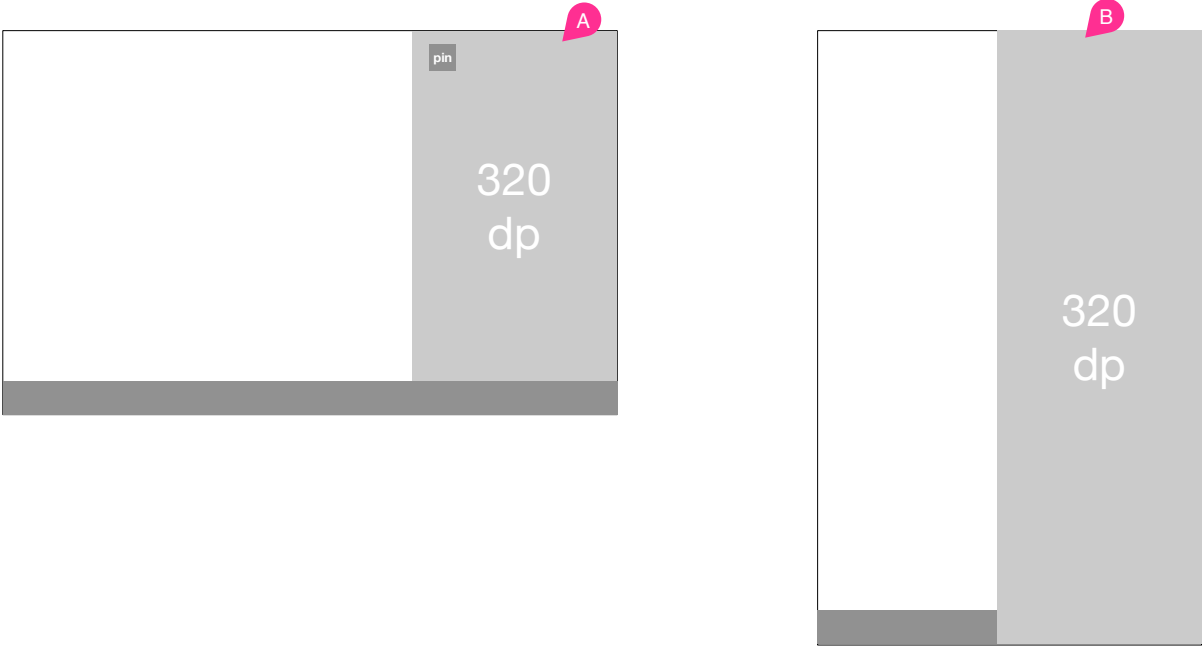

**Overview**

This screen comes up if user clicks/taps on an item that has expired.

**D.** Opens Yuzu website.

8.1 Tools Window Sizes

Overview

Tool window width rule recommendation is:

- A. The panel window width on any screens and orientations is 320 DP fixed. A user can Pin/Unpin the panel. By default the panel is Unpinned.
- B. If a device screen width, in landscape or portrait modes, is or less than 600 DP (7 inches devices), then the Tool Window is overlaying a viewer content and the bottom bar. **No Pin/Unpin button on 7 inch devices in portrait view.** All background functionality is blocked.

The Tools Window always opens:  
Text reflows or changes zoom ratio to accommodate the new width of the reading area (only if it's pinned).

Tools Window Persistence

- Certain tasks taking place in the Tools Window will be facilitated by allowing the user to refer back and forth between Tools window content and Viewer content:
- a When the user pins the Tools window in place, this is not an issue: Viewer content and Tools window content will both be visible at all times.
    - When the Tools window is pinned in place, the pinned window will remain in a pinned state when application is suspended (home button was pressed in app), or is closed
  - b When Tools window is not pinned and the user performs an action that populates the Tools window:
    - When an item is selected in the Tools window:
      - The Viewer content changes to the corresponding area of the item
    - The Tools window closes
    - The user is able to perform Viewer functions (read, navigate, annotate, etc.)
  - c If the user returns directly to the same function in the Tools window, they return to the same view that was present when the unpinned Tools window closed
  - d The previous view will not persist if:
    - The user opens a different Tools function
    - The user exits the session in any way
  - e If the Tools window is not pinned, the Tools window will remain when the application is in suspended (home button was pressed in app), and close when the app is closed.
  - g When the 'X' icon in the upper right corner of the Tools window is selected, the Tools window will closed (whether in a pinned or unpinned state).

Side note: this applies to TOC, History, Hub, Annotations, Search functions.

Landscape / Portrait

Feature Description: (Yuzu is designed for Landscape view. What happens if the user turns their device and goes into Portrait mode?)

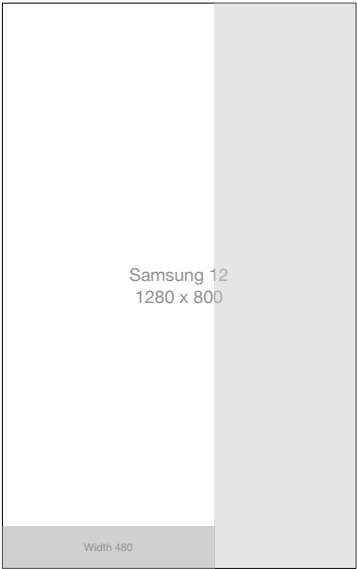

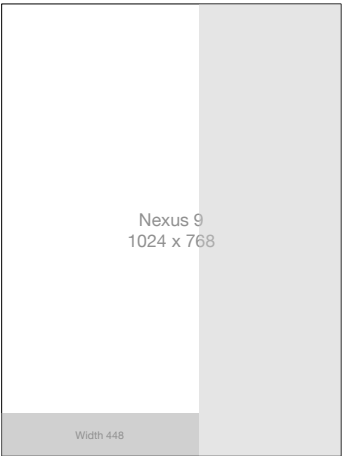

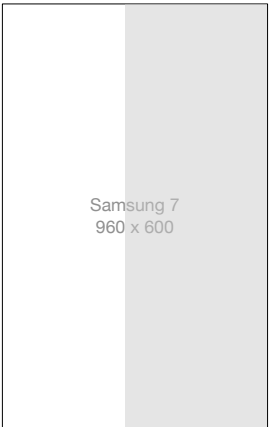

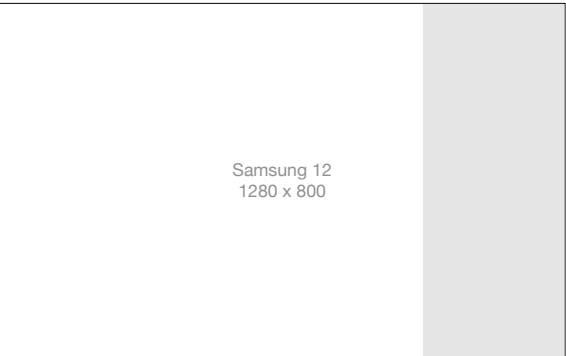

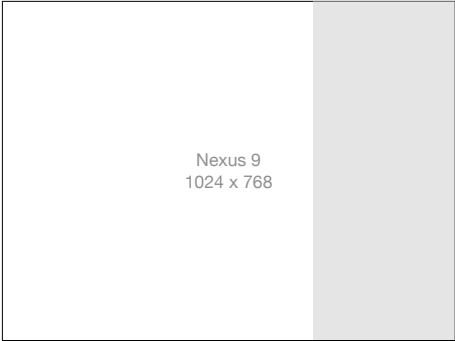

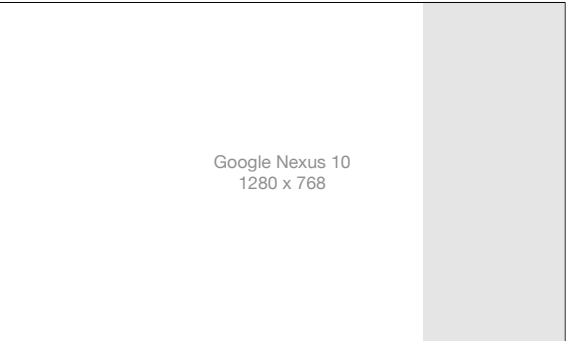

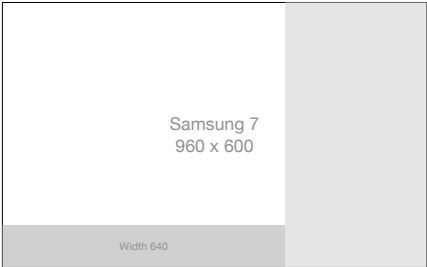

The application continues to function as specified. Tools window takes up the same proportional amount of space in portrait that it does in landscape

If the User is choosing to read their item in portrait mode: Most Tools functions will work well with the window overlaid (unpinned, see xxx 7000 ToolsWindow)

The user may wish to pin the Tools window, causing a reflow. **On 7 inches devices in the portrait view Pin/Unpin functionality is deleted.**

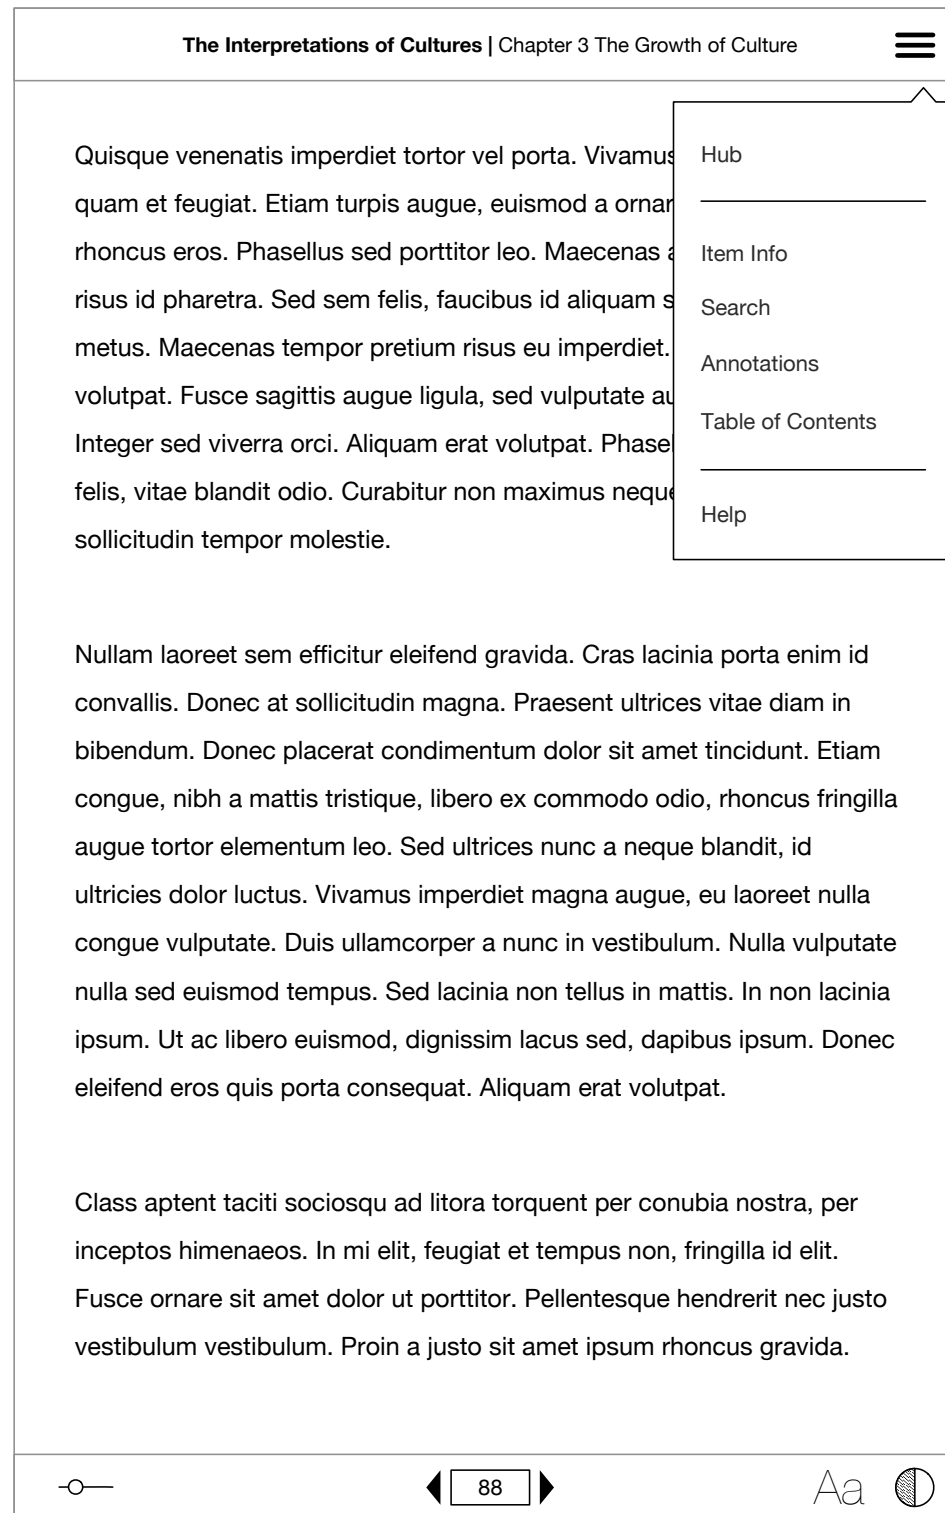

In the even that the user finds that view too narrow for easy reading and use of the features: They should turn the device to the side and view the material in landscape view while they perform these functions. When they have finished with the task that requires additional lateral space, they should return the device to a vertical position.

For feature size measurements, see redlines attached to AND300\_1006\_ToolsWindow.

## 10.1 Default Tools Menu View

## Overview

Three-lines 'hamburger menu' at top right corner of window invokes Main Menu with a tap.

Menu closes:

- With a second tap on the hamburger menu
- When user taps away from the menu  
This closing action affects only the menu; **menu locks out other activities until closed**
- When a menu item is chosen

Menu overlays other windows (Viewing or tools) that may be on screen

Menu items are grouped in 3 sections:

Section One:

**Hub** - Invokes Hub window (see YUZ300\_7011\_HubFunctions)

Section Two:

**Item Info** (see YUZ300\_7012\_ItemInfo)

**Search** (see YUZ300\_7001\_Search)

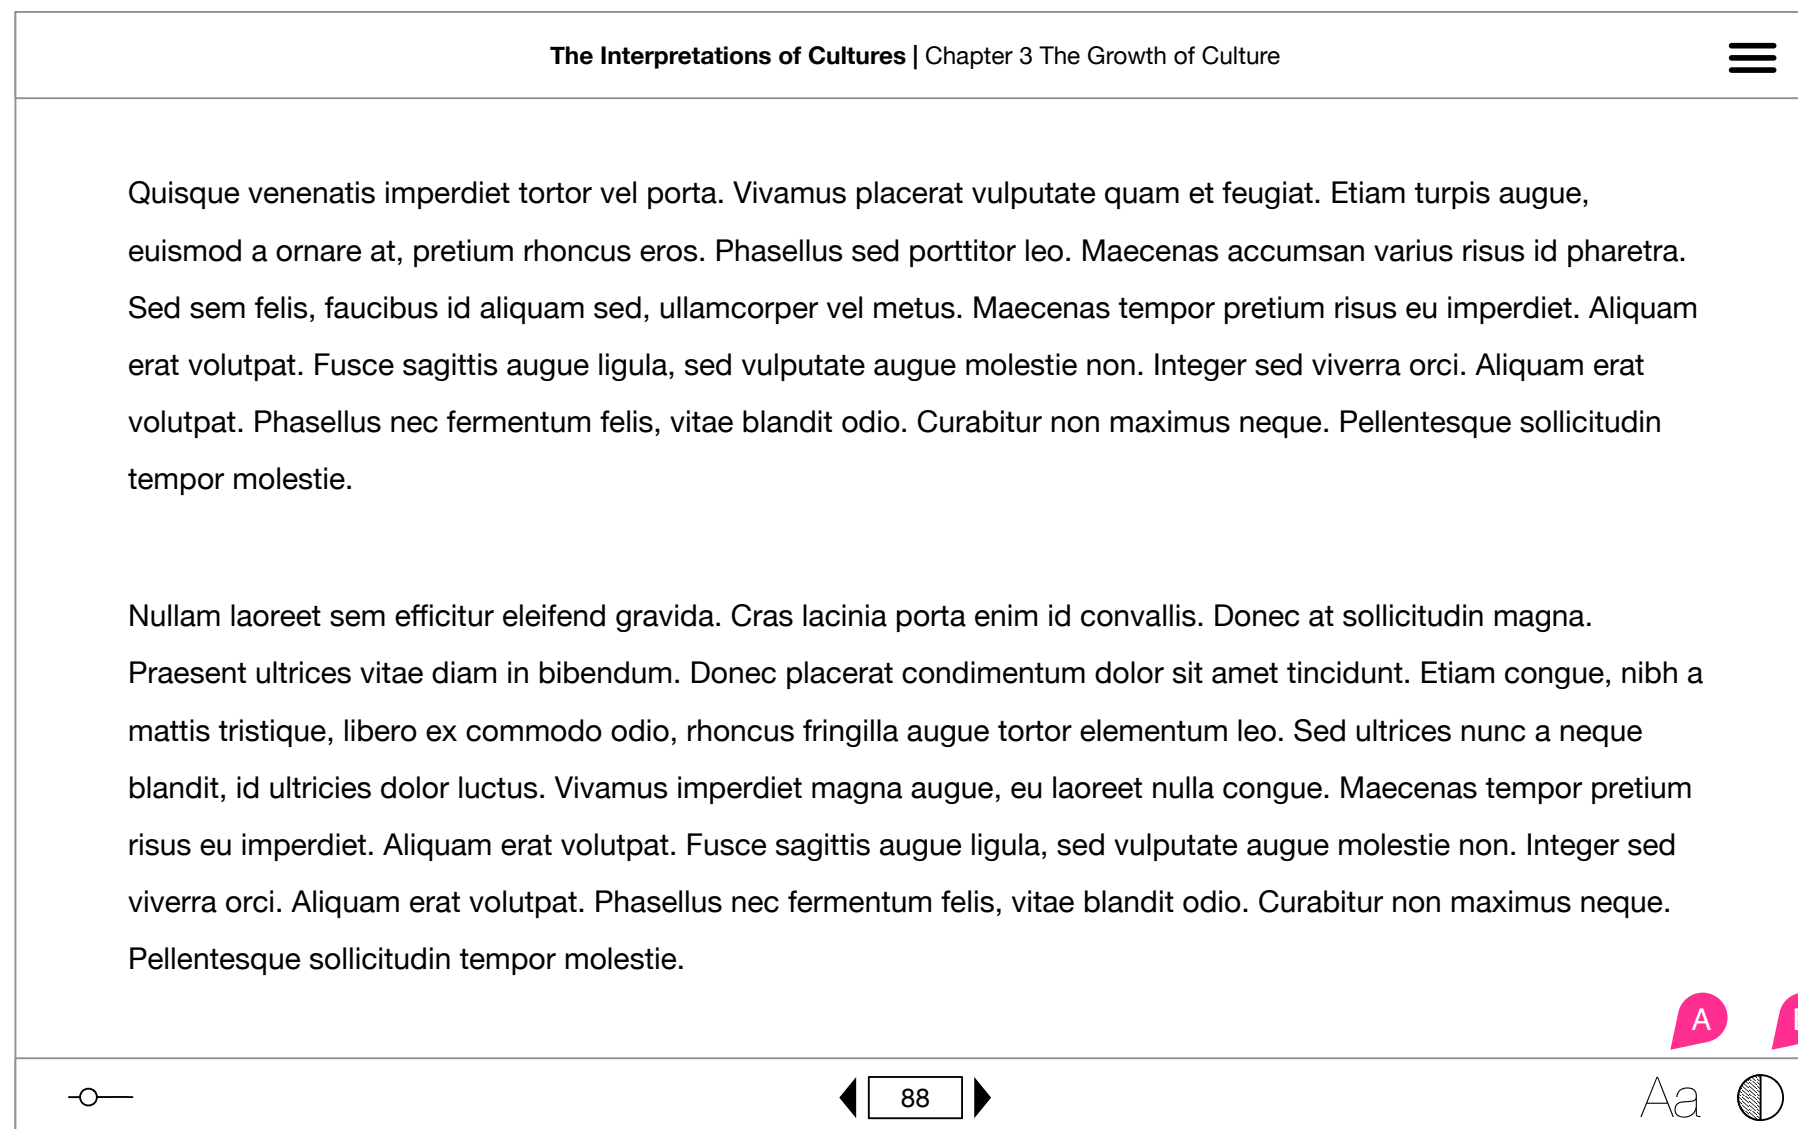

**Annotations** (see YUZ300\_7013\_AnnotationsView)

**Table of Contents** (see YUZ300\_7014\_TOCSearch)

Section Three:

**Help** (See YUZ300\_7017\_Help)

## 11.1 ePub Controls (Landscape)

## Overview

## A. EPUB view controls:

**Font selection popup.** A user can close the popup by tap somewhere outside the popup. **Fonts number is 3.** The fonts are presented in it's own style. There will be one default font (by Publisher or Near/ES team (Raleway)) and 3 additional fonts: Arvo, Merriweather, Quattrocento Sans. See additional info at YUZ300\_3015\_FontChoice.

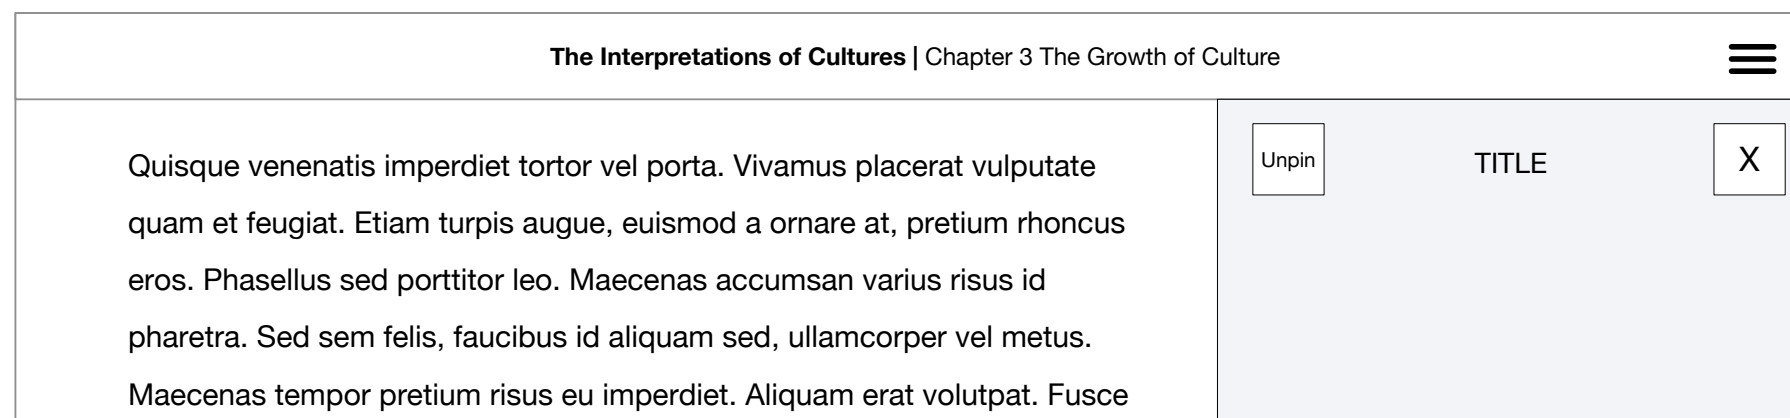

|                   |     |
|-------------------|-----|
| A -               | A + |
| Default           |     |
| Arvo              |     |
| Merriweather      |     |
| Quattrocento Sans |     |

## B. Theme selection popup

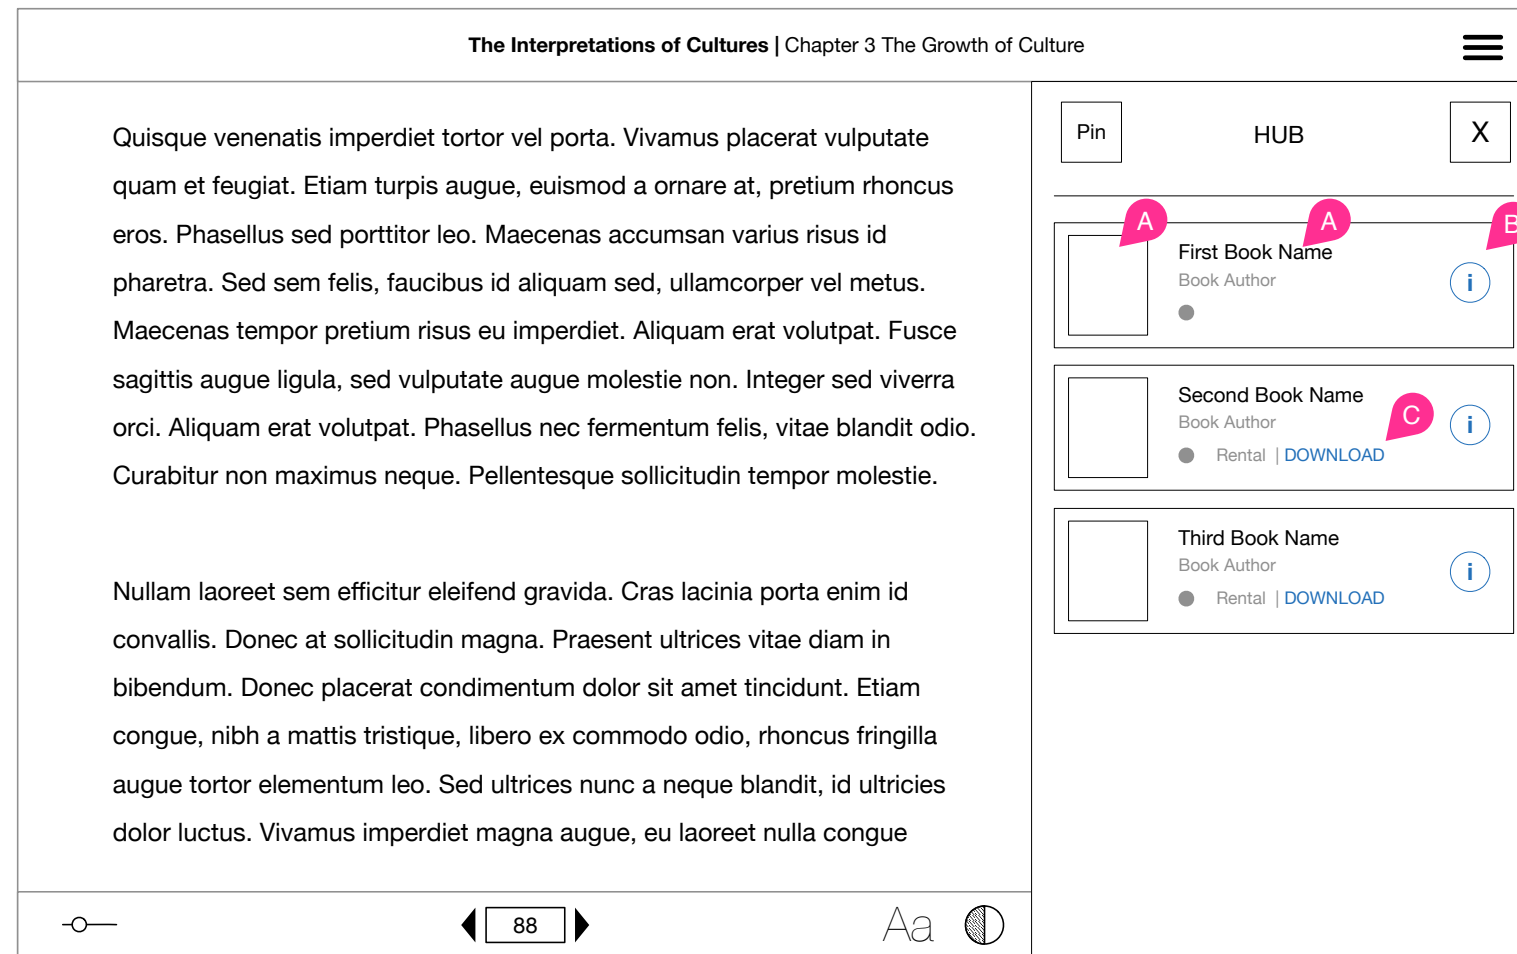

(AND300\_3011\_ColorSchemeReflowable):

|                                       |
|---------------------------------------|
| <input type="radio"/> Light           |
| <input checked="" type="radio"/> Dark |
| <input type="radio"/> Sepia           |

A user can close the popup by tap somewhere outside the popup.

## 12.1 Default Hub Window View

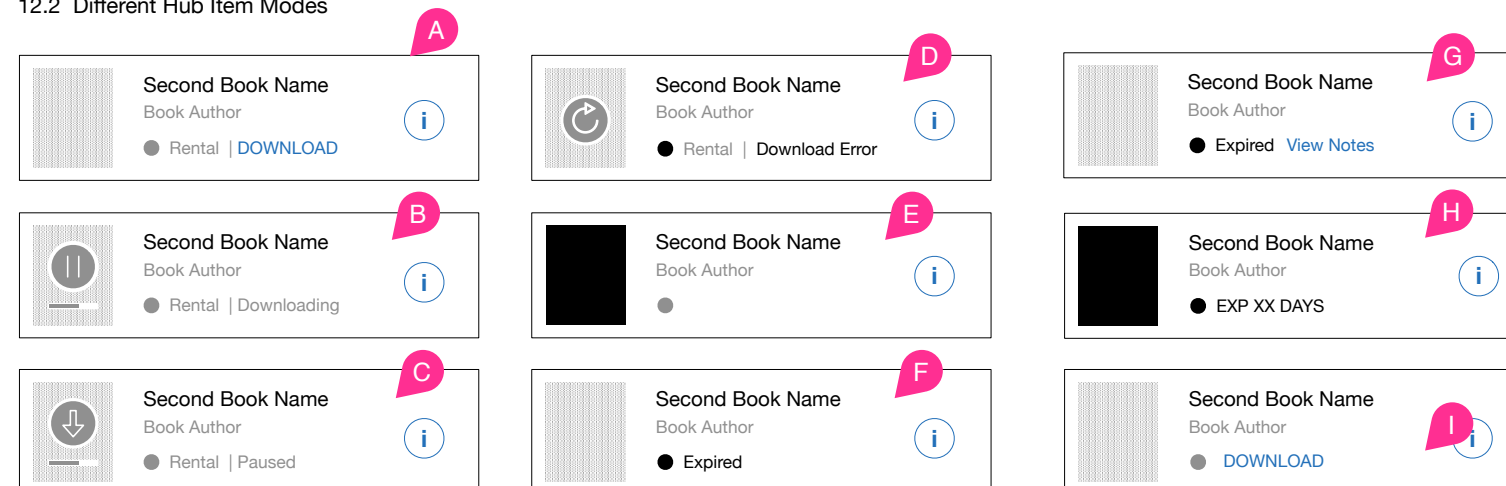

## Overview

**A.** Tap on the are containing the item cover and title details will launch item in Viewer.

**B.** Tap on a Book Image area with "i" (info mark) will change the Hub content on the panel to Item Info view (YUZ300\_7012\_ItemInfo).

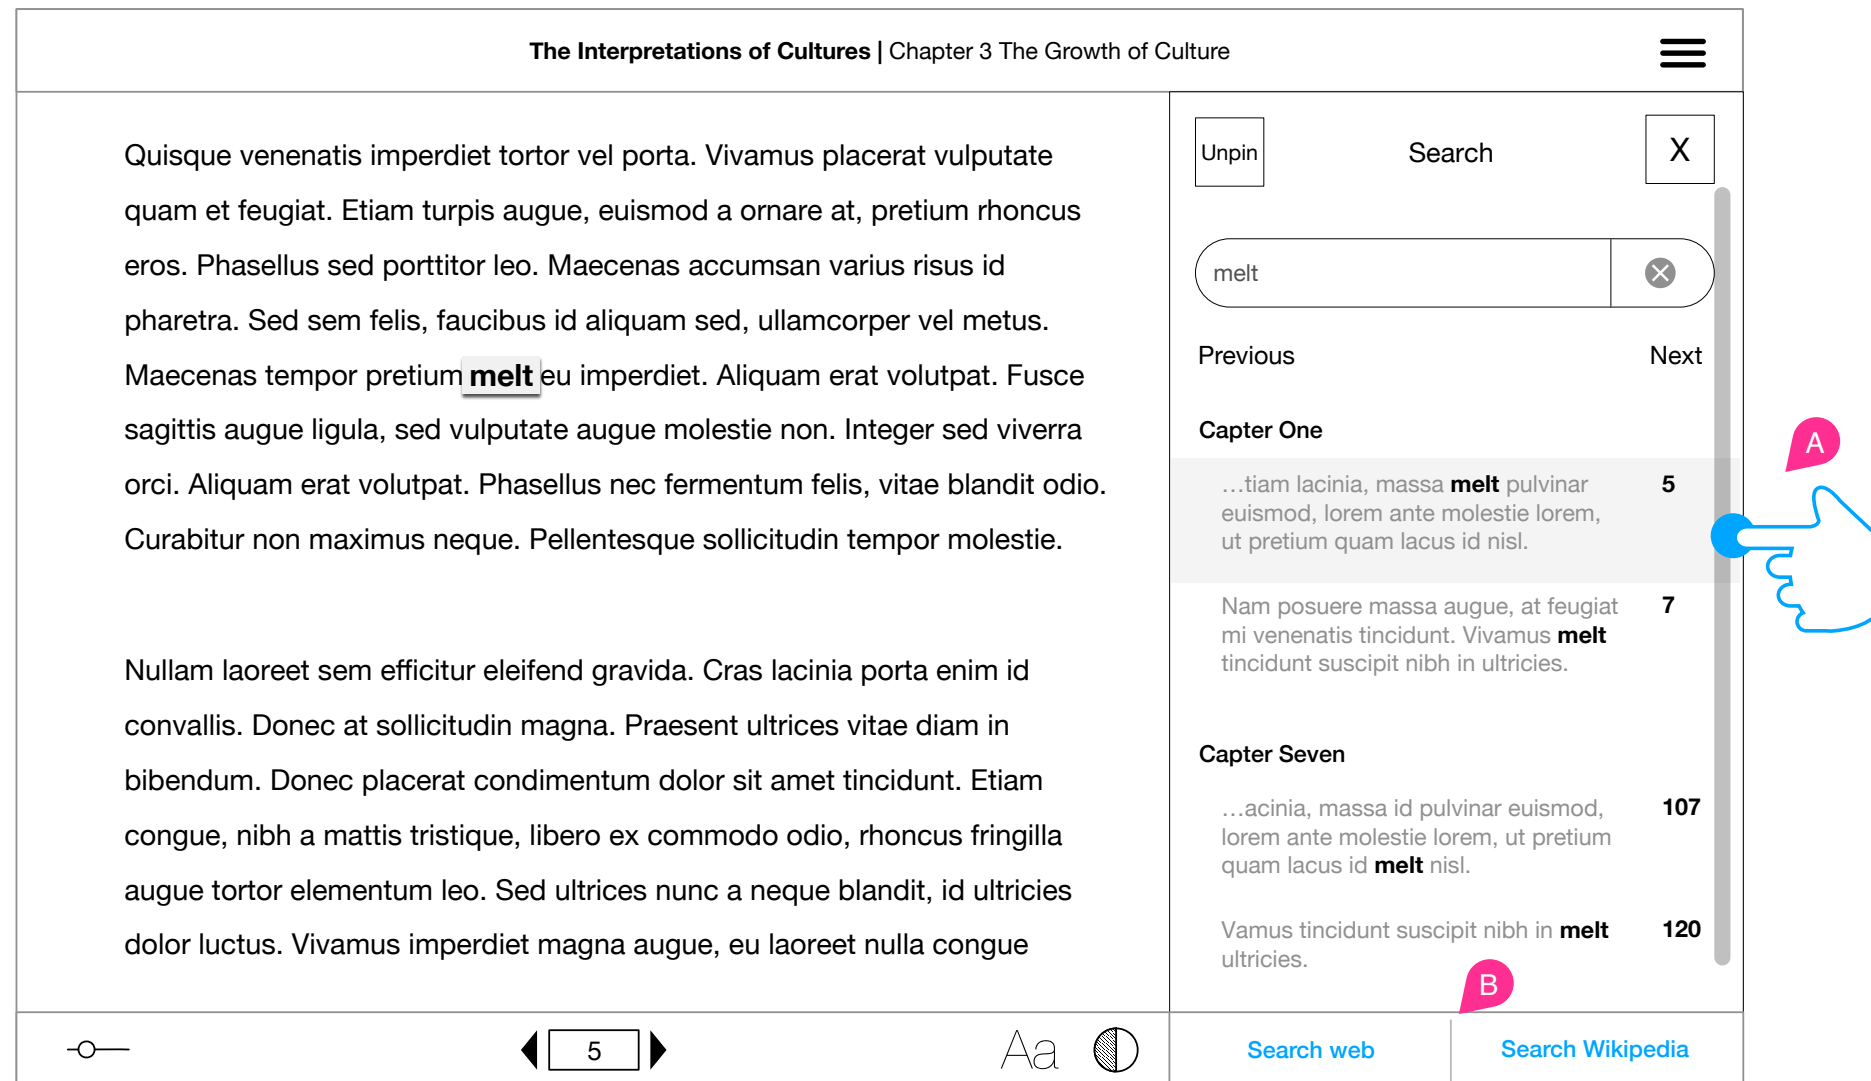

**C.** If item is not downloaded yet, then tap on the cover or title will start downloading process.

## 12.2 Different Hub Item Modes

## Overview

## 15.1 Search Window - Pinned Mode

## Overview

**User wishes to find single or recurring instances of a text string in the open item:**

User selects the 'Search' text in the Tools Menu or selects CTRL + F (keyboard users):

- a opens Search in Tools Window in unpinned state
- b user is able to enter search text

User selects text in the item and chooses 'Search' from dropdown

- a Search Window opens in unpinned state with selected text populating the text window
  - i Search results are populated on window open
- a User may edit text in search box and re-initiate search

**Search Window description:****Search Results Format**

Page numbers are **not** included in search results.

Chapter name and number (if available) is listed above text match results.

If there is more than one match in a chapter, the results are listed below a single mention of the chapter

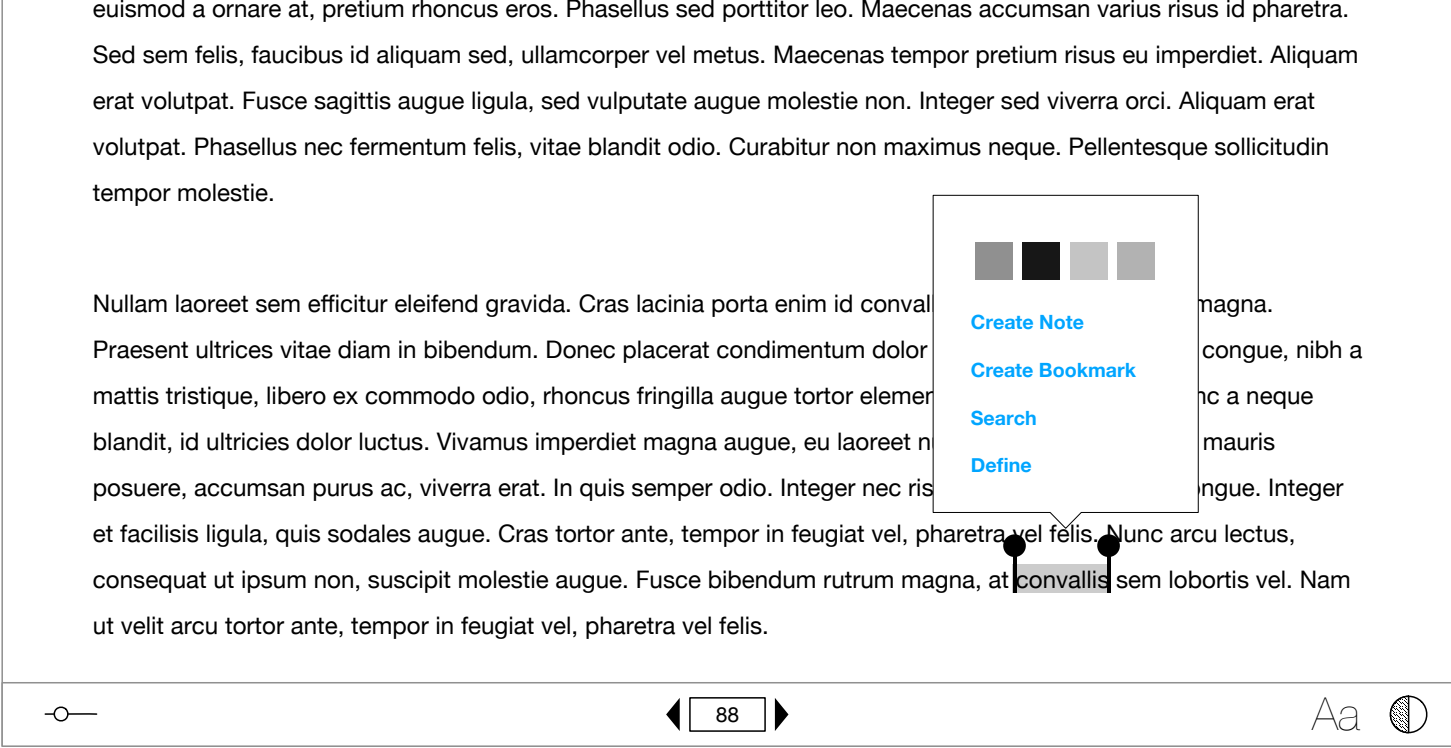

The search text string is visually called out.

The 20 characters before and after the search text string are appended before and after the highlighted search text string in the result.

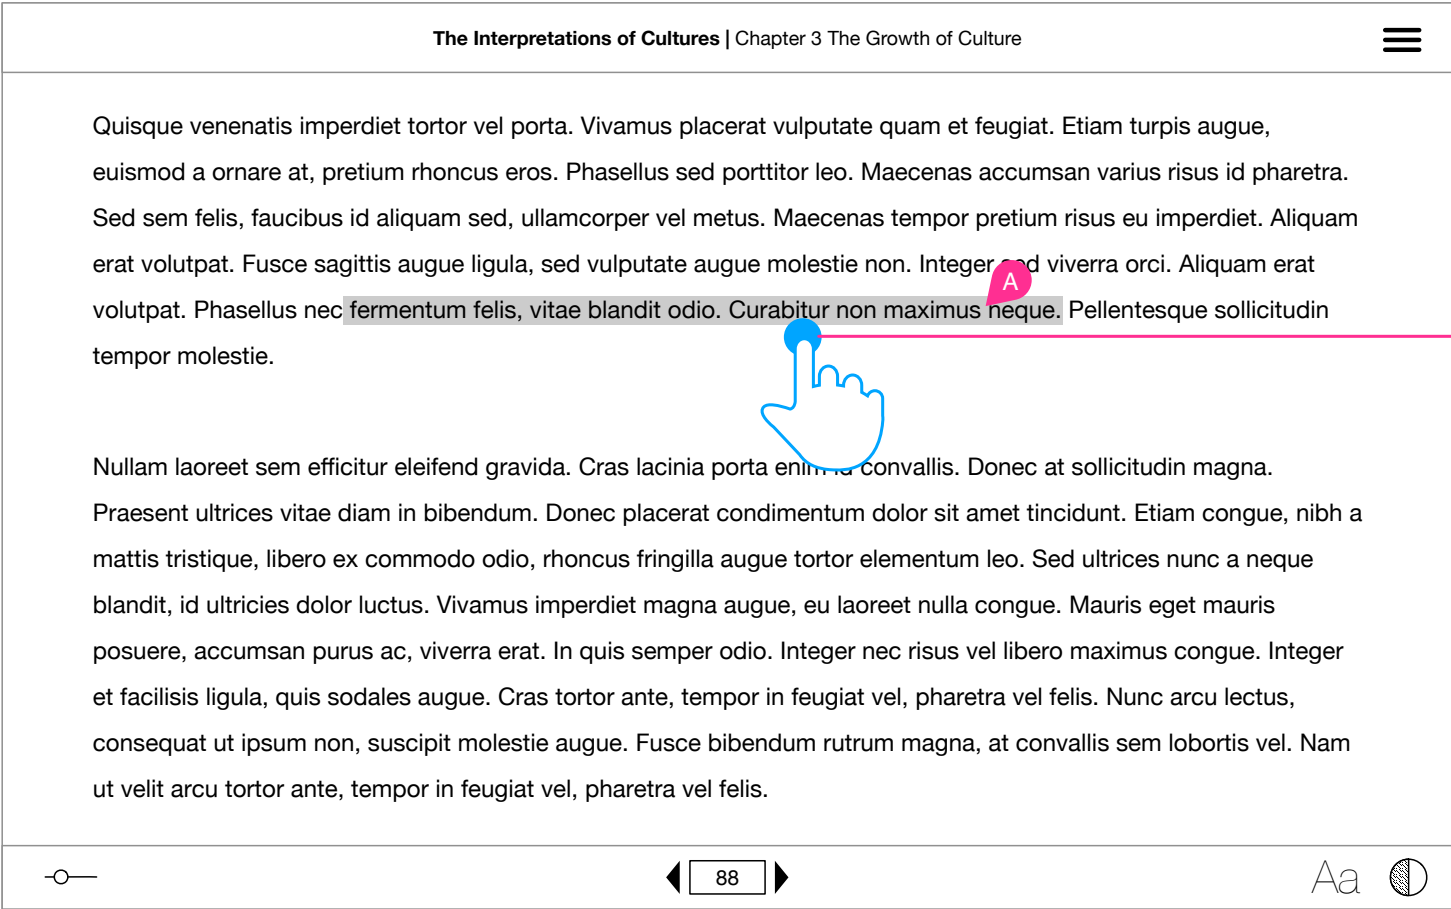

Results are shown in an area with fixed vertical size of three lines of type.

If fewer than three lines in result, first line is aligned at top of area.

If result is longer than three lines, result will truncate with an ellipse.

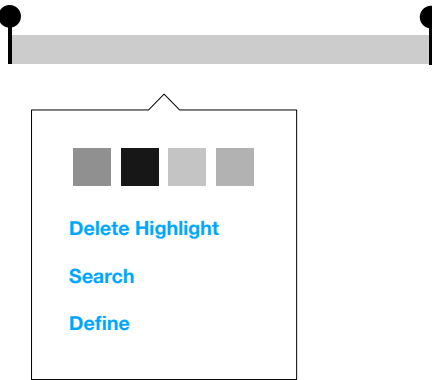

17.3 Edit Highlight

Overview

A. If a user tapping to select highlight he we'll see the following popup. Similar to previous one, just "Add Note" function is removed.

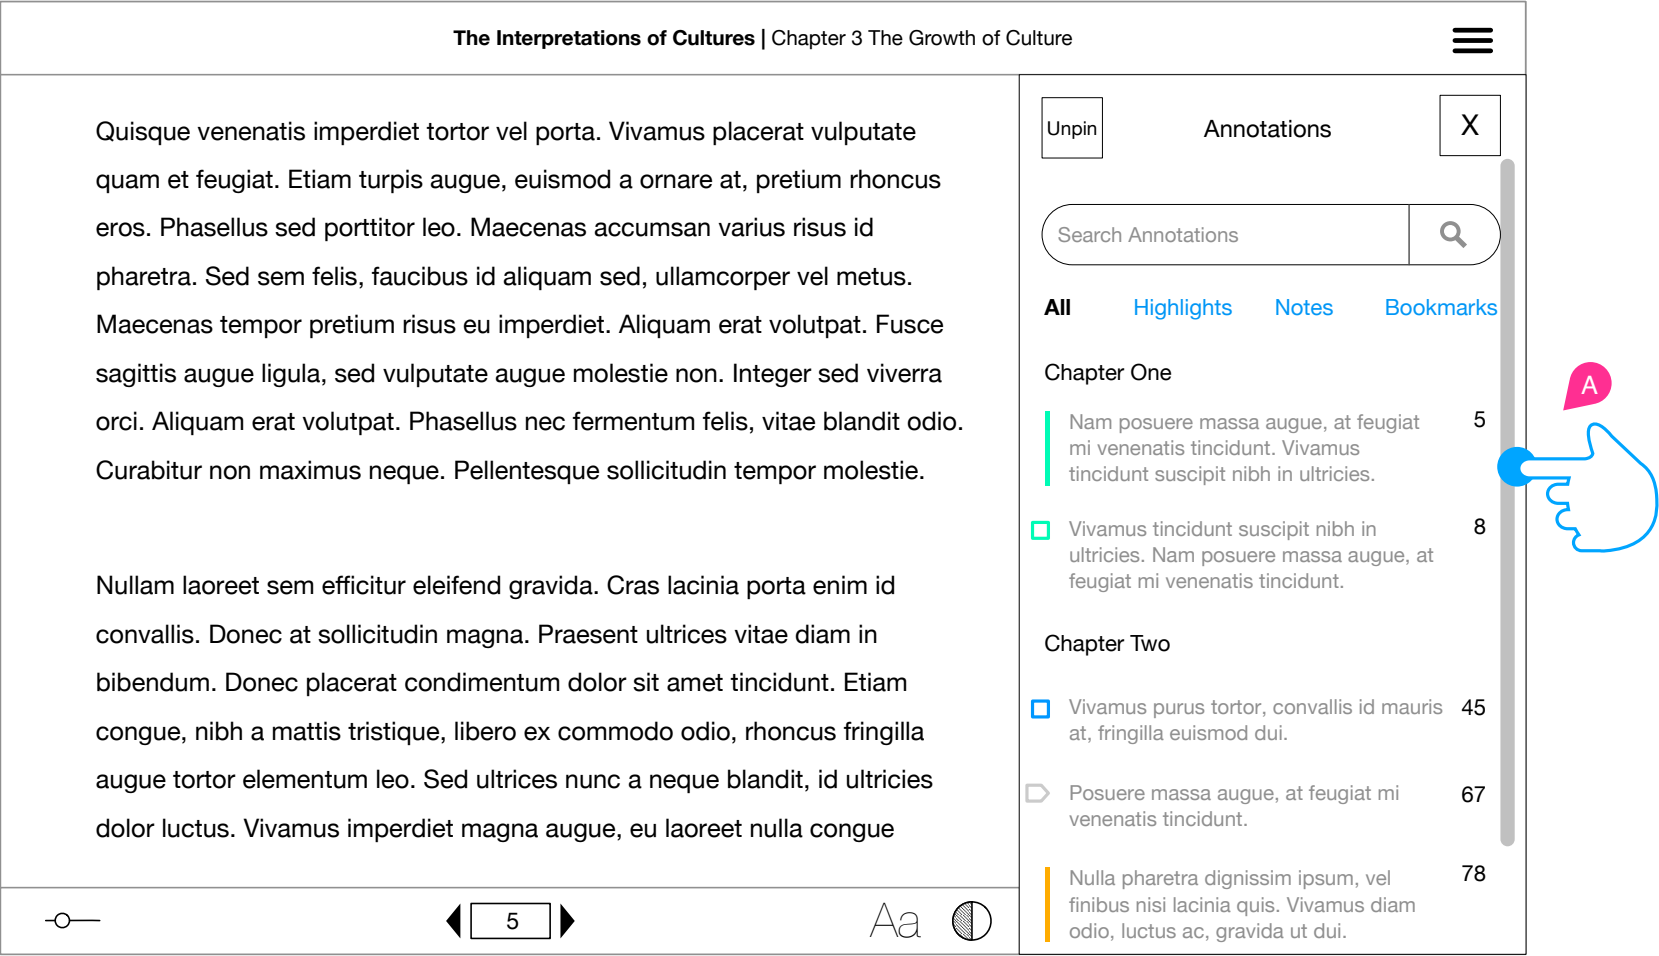

- Selection handles appear
- 1 User has the option to change highlighted text selection by moving the handles
  - 2 User may change the text selected by moving the handles
    - a The popup window disappears when a handle is selected
    - b The popup window reappears when the handle is released

Quisque venenatis imperdiet tortor vel porta. Vivamus placerat vulputate quam et feugiat. Etiam turpis augue, euismod a ornare at, pretium rhoncus eros. Phasellus sed porttitor leo. Maecenas accumsan varius risus id pharetra. Sed sem felis, faucibus id aliquam scelerisque. Quisque eu imperdiet. Aliquam erat volutpat. Fusce sagittis augue ligula. Praesent ultrices vitae diam in bibendum mattis tristique, libero ex commodo blandit, id ultricies dolor luctus. Viva posuere, accumsan purus ac, viverra et facilisis ligula, quis sodales augue consequat ut ipsum non, suscipit molestie augue. Fusce bibendum rutrum magna, at convallis sem lobortis vel. Nam ut velit arcu tortor ante, tempor in feugiat vel, pharetra vel felis.

Viva posuere, accumsan purus ac, viverra et facilisis ligula, quis sodales augue consequat ut ipsum non, suscipit molestie augue. Fusce bibendum rutrum magna, at convallis sem lobortis vel. Nam ut velit arcu tortor ante, tempor in feugiat vel, pharetra vel felis.

21.1 Default Annotations Window

Overview

Annotations Window opened from Tools Menu

**Controls on Annotations Window:**

**Standard Tools Window** controls (see xxx 7000 ToolsWindow)

**Search:** Text box with 'Search' placeholder text inside. If no search results: Text: "Search text not found". Search term limits are the same as the regular search term limits.

**View selections: All** (default view). If no user-created highlights, show text message: There are no bookmarks, highlights, or notes available for this item."

**Highlights.** All highlights limits are 3 lines, then truncated. If no Highlights, show text message: "There are no highlights available for this item."

**Notes (see the illustration at the right).** All notes are written in full, without any truncation. If no Notes, show text message: "There are no notes available for this item. "

**Bookmarks.** All bookmarks limits are 3 lines, then truncated. If no Bookmarks, show text message: "There are no bookmarks available for this item. "

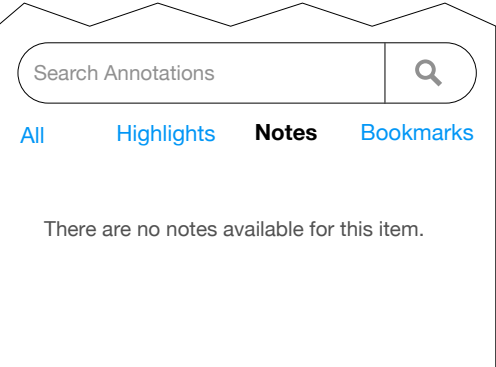

**Format is:**

**Chapter number** and header are listed above results. Multiple results from the same chapter/header will be listed under a single listing of the chapter/ header.

**Page number/page name** (if available) is listed to the right of each annotation.

**Icon or indication of Highlight, Note, or Bookmark** is placed in the margin to the left of each annotation (as shown in example above).

Empty Notes Tab Sample

## 22.1 Default Annotations Window

The Interpretations of Cultures | Chapter 3 The Growth of Culture

Quisque venenatis imperdiet tortor vel porta. Vivamus placerat vulputate quam et feugiat. Etiam turpis augue, euismod a ornare at, pretium rhoncus eros. Phasellus sed porttitor leo. Maecenas accumsan varius risus id pharetra. Sed sem felis, faucibus id aliquam sed, ullamcorper vel metus. Maecenas tempor pretium risus eu imperdiet. Aliquam erat volutpat. Fusce sagittis augue ligula, sed vulputate augue molestie non. Integer sed viverra orci. Aliquam erat volutpat. Phasellus nec fermentum felis, vitae blandit odio. Curabitur non maximus neque. Pellentesque sollicitudin tempor molestie.

Nullam laoreet sem efficitur eleifend gravida. Cras lacinia porta enim id convallis. Donec at sollicitudin magna. Praesent ultrices vitae diam in bibendum. Donec placerat condimentum dolor sit amet tincidunt. Etiam congue, nibh a mattis tristique, libero ex commodo odio, rhoncus fringilla augue tortor elementum leo. Sed ultrices nunc a neque blandit, id ultricies dolor luctus. Vivamus imperdiet magna augue, eu laoreet nulla congue

## Overview

## Search functions may be initiated from the Tools/Annotations window

- Text box with 'Search' in ghosted gray text on the left side of the box
  - Light 'x' at the right edge of the text box persists when text is entered, function is to delete all text in the text entry box.
- Characters typed into the text box cause the 'Search' text to disappear
- 'Go' button to the right of the text box initiates search
- Search results are returned for alpha, numbers, and special characters
  - Special character whitelist: ! @ # \$ % ^ & \* ( ) \_ + = - { } [ ] \ | / ? . , < > 1 2 3 4 5 6 7 8 9 0
  - Search is for exact text as entered; no wild card characters, predictive search, or fuzzy logic search.
  - Search results will respect user-entered punctuation
    - eg., Search for "Good news, everyone" will not return a result for 'Good news everyone'
  - Search results will assume a space before and after user-entered search terms.
    - eg, Search for "the" will not return results for "their, they're, etc."
  - If no search results: Text: "Search text not found"
- When Annotations window closes,, the entered search text persists (the next time Search is opened) on a device level as long as this item is opened.

Bonus

## 4.1 MPL

## Overview

MPL is "Mobile Premiere Listing". The only mobile specific ad product. Click takes user to MIP. MPL includes (max case): Photo, Business name, AD indicator, Tagline (not truncated, could be 2 lines), Address, Distance, Cuisine/Category, Cost ind., Star Rating with Number, Call button with Number, Directions button, Indicators.

A. Serving nearby areas/ exact address unknown text instead of address or slogan.

B. No Rating option.

C. Serving location option instead of Business address.

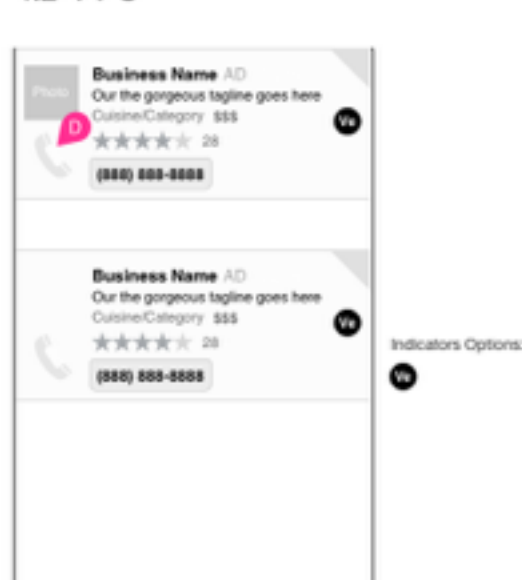

`{{location}}` = reverse-geocoded City, State (for Current location search).

`{{location}}` = ZIP code (for manually entered ZIP search)

`{{location}}` = City, State (other cases).

I. Dogear - no functionality right not, for Preview Only.

## 4.2 PPC

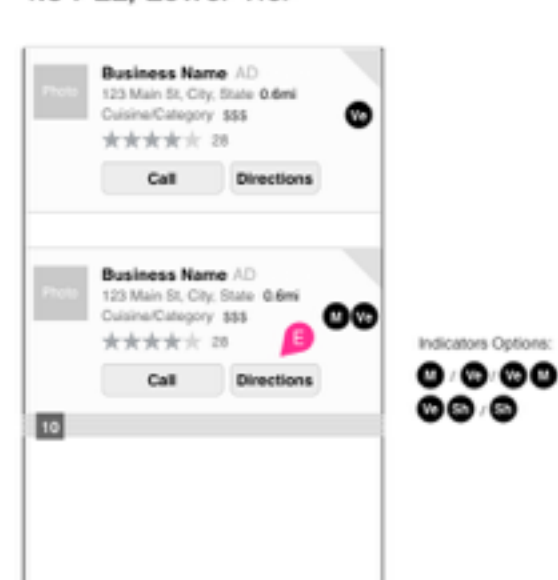

## Overview

PPC - "Pay Per Call" ad.

PPC ads display in the MPL slot if no MPL is available. On apps, several PPC ads can display and will rotate within the ad slot. Tapping anywhere in the listing calls the business. On mobile web currently only one PPC ad displays. PPC includes (max case): Photo, Business name, AD indicator, Tagline (not truncated, could be 2 lines), Cuisine/Category, Cost ind., Star Rating with Number, Call button with Number, Directions button, Indicators (just "Verified" indicators) + "Tap to call" indicator.

D. "Tap for Call" indication

## 4.3 PLL, Lower Tier

## Overview

PPL - within organic listings. The PPL is a web ad product.

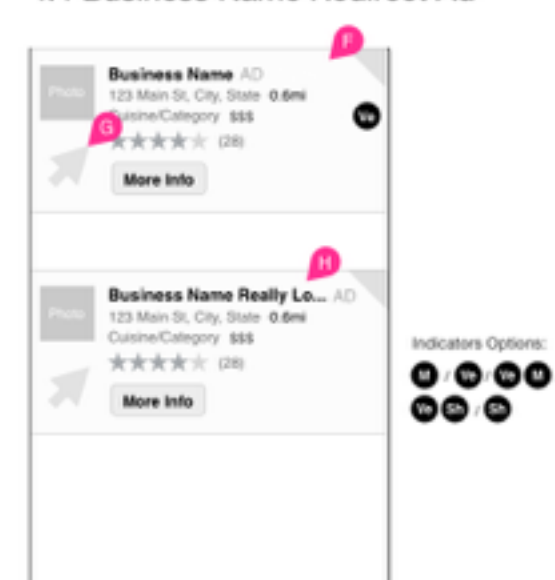

Lower Tier - ad within organic listing.

PPL or Lower Tier Ad includes (max case): Photo, Business name, AD indicator, Address (or Service Area text or Address Issue indicator), Distance, Cuisine/Category, Cost ind., Star Rating with Number, Call button with Number, Directions button, Indicators. Chain collapse is also possible case.

For indicators please see description for View 4.1

E. Chain Collapse Variations

## 4.4 Business Name Redirect Ad

## Overview

Business Name Redirect ad product.

For some national advertisers, the listing on the SRP links to the business website instead of our MIP. Listings in mob web have no special visual treatment since the user can still access MIP by tapping on the "More info".

Business Name Redirect ad product includes (max case): Photo, Business name, AD indicator, Address (or Service Area text or Address Issue indicator), Distance, Cuisine/Category, Cost ind., Star Rating with Number, Indicators. Chain collapse is also possible case.

F. By tap on the ad User is taken to Business Website instead of our MIP.

G. Tap for Redirect indication.

H. AD long business name sample.
